

## GERMANY REITERATES OFFER OF IMMUNITY TO NEUTRALS GIVES ASSURANCE THAT U. S. SHIPS IN LEGITIMATE TRADE WILL NOT BE HARMED

### Asks That Ships Be Provided With Distinguishing Marks and Their Arrival Announced A Reasonable Time in Advance—Imperial Government Disclaims Responsibility for Sinking of the Lusitania.

BERLIN, July 9.—via London, July 10.—Germany's offer, embodied in the reply to the United States note regarding sinking of the Lusitania and submarine warfare, which was delivered to James W. Gerard, the American ambassador last night is:

First: Reiterated assurance that American ships engaged in legitimate trade will not be interfered with, nor the lives of Americans upon neutral ships be endangered.

Second: That German submarines will be instructed to allow American passenger ships to pass freely and safely, Germany entertaining in return the confident hope that the American government will see that these ships do not carry contraband; such ships to be provided with distinguishing marks and their arrival announced a reasonable time in advance. The same privilege is extended to a reasonable number of neutral passenger ships under the American flag and should the number of ships thus available for passenger service prove inadequate Germany is willing to permit America to place four hostile passenger steamers under an American flag to ply between North America and Europe under the same conditions.

Text of German Note follows:

"Berlin, July 8th.  
"The undersigned has the honor to make the following reply to His Excellency, Ambassador Gerard, to the note of the 10th ultimo, the paramount of the American interest by the German submarine war."

"The Imperial government learned with satisfaction from the note how earnestly the government of the United States is concerned in seeing the principles of humanity realized in the present war. Also this appeal finds ready echo in Germany and the Imperial government is quite willing to permit its statements and decision in the present case to be governed by the principles of humanity just as it has done always."

"The Imperial government welcomed with gratitude when the American government in the note of May 15th, itself recalled that Germany had always permitted itself to be governed by the principles of progress and humanity in dealing with the law of maritime war. Since the time when Frederick the Great negotiated with John Adams, Benjamin Franklin and Thomas Jefferson the treaty of friendship and commerce of Sept. 9th, 1785, between Prussia and the Republic of West, Germany and the American statesmen have, in fact, always stood together in the struggle for the freedom of the seas and for the protection of peaceable trade. In the international proceedings which since have been conducted for the regulation of the laws of maritime war Germany and America have jointly advocated progressive principles, especially the abolishment of the right to capture at sea and the protection of the interests of neutrals."

**Hopes for Regulation of Law.**  
"Even at the beginning of the present war the German government immediately declared its willingness, in response to proposals of the American government, to ratify the Declaration of London and thereby subject itself in the use of its naval forces to all the restrictions provided therein in favor of neutrals. Germany likewise has been always zealous of the principle that war should be conducted against the armed and organized forces of an enemy country, but that the enemy civilian population must be spared as far as possible from the measures of war. The Imperial government cherishes the definite hope that some way will be found when peace is concluded or perhaps earlier, to regulate the law of maritime war in a manner guaranteeing the freedom of the seas and will welcome it with gratitude and satisfaction if it can work hand in hand with the American government on that occasion."

**Government Disclaims Guilt.**  
"If in the present war the principles which should be the ideal of the future have been traversed more and more, the longer its duration, the German government has no guilt therein. It is known to the American government how Germany's adversaries, by completely paralyzing peaceable traffic between Germany and neutral countries, have aimed from the very beginning and with

## ARREST FOUR IN 1868 IOWA MURDER CASE

### ARRANGEMENTS ARE MADE TO PROTECT STATE'S CHIEF WITNESS

Defendants Will be Given Preliminary Hearing Tuesday—Wealthiest Defendant Characterizes Whole Proceeding as a "Huge Joke."

Bedford, Iowa, July 9.—With four men under arrest for alleged complicity in the murder of a wealthy stockman and his son at St. Joseph, Mo., in September, 1868, and arrangements made for the protection of the state's chief witness, representatives of Attorney General Cosson's office said tonight they were prepared for the next phase of Taylor county's double murder and buried treasure. This, they said would come Thursday when the preliminary hearing of the defendants, Bates Humstma, Samuel Schriver and Henry and John Dameswood will be held in the local court.

**Insure Mrs. Porter's Appearance.**  
C. A. Robbins, assistant attorney general left tonight for Des Moines for a conference with his chief, Attorney General Cosson, after arrangements had been made to insure the appearance of Mrs. Maria Porter, of Quitman, Mo., at the hearing Tuesday. She is the woman, who, as a 14 year old girl, is said to have witnessed the killing of the cattleman believed to have been Nathaniel Smith, of St. Joseph, Mo., and his son, and the subsequent burial of \$90,000 on the old Collins farm near St. Joseph.

**Terms Proceeding a Joke.**  
Samuel Schriver, the wealthiest man among the defendants, in an interview hereto day characterized the whole proceeding as a "huge joke." The Dameswoods, notwithstanding they declined to treat the matter seriously, announced that they wished to retain the "best lawyers" in the county.

Another version of the treasure story came to light, when old residents said the money had been buried on the farm by the James boys after they had robbed a bank. This was said to account for their interest in locating it in after years.

**Plat is Lost in Fire.**  
The loss of the plat in a fire, which burned the house on the place and the death of Jonathan Dark, the only member of the gang who knew where it had been buried, it was claimed, made necessary the search that extended through so many years.

## THREE BANDITS ROB PARTY OF TOURISTS IN YELLOWSTONE PARK

### More Than 125 Including U. S. Senator Brady of Idaho, Fall Victims to Highwaymen.

Livingston, Mont., July 9.—United States Senator James H. Brady of Idaho and a party of tourists led by a New Yorker named Rice, consisting of about 125 teachers, was held up in Yellowstone Park today by three highwaymen. Rice was fired at when he jumped down from a stage coach and ran back to warn other members in the second stage coach.

The bullet fired at Rice flattened itself against a rock nearby. Rice sped on and the bandits realizing that the sound of the shot would act as an alarm, fled into the woods. How much they succeeded in obtaining from the tourists had not been learned tonight.

**Loss Is Believed Small.**

Salt Lake City, July 9.—An official report of the Yellowstone park held up received by E. E. Calvin, general manager of the Oregon Short Line railroad tonight says:

"Five coaches of the Gillespie, Kinports and Beard company party were held up by two men a mile and a half beyond the junction of the Gibbon and Firehole rivers about 10 a. m. today. Senator James H. Brady of Idaho and F. J. Haynes of the Yellowstone-Western Stage company, who were immediately behind these coaches, turned and drove to a road camp and reported the holdup to Col. Brett, commandant of the park, who now has cavalry looking for the men. The loss is said to be very small. No one was injured."

## THROW BOMB AT SULTAN.

London, July 10.—A dispatch to Reuters Telegram company from Alexandria, Egypt, states that while the Sultan of Egypt was going to pray, a bomb was thrown from a window and fell at the feet of the horses. It did not explode, however. The person who threw the bomb escaped.

## NO CHANGE IN CONDITION.

Rochester, N. Y., July 9.—At 10 o'clock tonight physicians at the bedside of Archbishop Quigley of Chicago announced that no material change had taken place in the prelate's condition. The archbishop was unconscious all day today and was gradually sinking, as he had been for several days.

## Cincinnati, O., July 9.—The death

toll as a result of the storm which struck Cincinnati Wednesday night reached 31 with the finding late today of the body of a negro woman in the ruins of a wrecked building on Sixth street near Mound street. Earlier in the day the body of J. Cohen had been recovered.

## War News Summarized

An advance of 700 yards along a narrow front in the Vosges in which the French captured 800 unwounded Germans, and the surrender of the German forces in German southwest Africa to General Botha, are the latest important war developments. These successes and the stand being made by the Russians in southern Poland are cited by British military critics as proof that the tide of war is turning.

In Russian Poland, in the vicinity of Krasnik, fighting continues, while the situation in the northeast of the Russian war theater is unchanged.

West of the Vistula, however, the Austrians claim to have held all Russian advanced positions recently captured by them. In the "Corinthian-Tyrol" frontier, in the Italian war theater, the Austrian official statement says there have been artillery duels and skirmishes.

## JUDGE HENDRICK REFUSES TO DECLARE MISTRIAL IN THAW CASE

### Stanfield Charges That State Had Expert Lip Reader Translating Thaw's Conversations For the Benefit of Aliens.

New York, July 9.—A charge by John D. Stanfield, chief counsel for Harry K. Thaw, that the state had in Justice Hendrick's court an expert "lip reader" who was translating for the benefit of aliens whispered conversations the slayer of Stanford White had with his attorneys and members of his family, precipitated a request today by Deputy State Attorney General A. L. Becker that a mistrial be declared.

Justice Hendrick refused to grant the petition, but instructed the jury that remarks by counsel were not to be considered.

Thaw himself was on the witness stand at the time of the occurrence. He was excused without cross-examination immediately after it. During the day he told his own story of how he shot and killed Stanford White, and gave his ideas about aliens who have testified for the state at previous proceedings.

## CITIZENS' STATE BANK OF CRYSTAL LAKE CLOSES DOORS

CHICAGO, July 9.—The Citizens' State Bank of Crystal Lake closed its doors today and was taken in charge by the state auditor's office. This action followed a meeting of the board of directors at which it is said to have developed that \$127,000 of securities held as assets are worth far less than their face value. The state bank examiner ordered suspension of business when the regular opening hour came today and an immediate examination of the books was begun. The bank has a capital stock of \$50,000. Deposits are given as \$300,000.

The stock of the institution was owned by some of the wealthiest men in McHenry county.

## EDITOR IS GIVEN JAIL SENTENCE AND FINE FOR CONTEMPT OF COURT

INDIANAPOLIS, Ind., July 9th.—George M. Ray, editor and publisher of a local Democratic weekly newspaper, today was adjudged in contempt of court by Judge James A. Collins of the criminal court and was sentenced to jail for thirty days and fined \$25. On June 17th, an editorial appeared in Ray's paper which commented on the activities of the Marion county grand jury. A few days later the grand jury indicted Thomas Taggart, Mayor Joseph E. Bell and others for alleged election frauds.

## KITCHENER MAKES APPEAL FOR RECRUITS FOR BRITISH ARMY

War Minister is Given Remarkable Ovation by the Public on His Visit to the London Guild Hall.  
London, July 9.—Field Marshal Earl Kitchener whose conduct of the war office has been criticized by certain sections of the British press, received a very remarkable ovation from the public today on his visit to the London Guild Hall to make an appeal for recruits and particularly for reserves for the great army he has raised since the outbreak of the war.

From the war office to the Guild Hall great crowds assembled to welcome the secretary of war and as he drove through troop-lined streets cries of welcome and confidence were shouted at him while a meeting of business men in the Guild Hall unanimously voted confidence in his administration. The great need of the moment, said Earl Kitchener, was men, material and money. Money being raised by loan was a success, he said, and he assured the meeting that the question of material was being dealt with in a highly satisfactory manner by the ministry of munitions. But there still remains the vital need of men he would require he declared.

## WELCOME MISS ADDAMS HOME.

New York, July 9.—Miss Jane Addams, who recently returned from a peace mission in Europe, was welcomed home at a mass meeting tonight in Carnegie Hall held under the auspices of the peace organizations of various states.

## OFFICERS BELIEVE BOMB FIRED SHIP

### Minnehaha Captain Confident Holt Was Responsible for Explosion

## TELL THRILLING STORIES

### Force of Explosion Blows Hatch Cover Off, Carrying Two Sailors Ten Feet in Air

## DRIVES SHIP THROUGH GALE

HALIFAX, N. S., July 9. — A bomb placed aboard the Atlantic transport liner Minnehaha, probably while she lay at her pier in New York, caused the explosion and fire at sea, in the opinion of the officers of the steamer, which put in here for examination today. The explosion occurred in No. 3 hold and was of terrific force, shaking the vessel from stem to stern. Those of the crew who were forward at the time were fairly stunned by the shock and two sailors were hurled bodily into the air. Flames followed quickly and for two days and two nights the crew battled heroically to save the ship.

## Believe Holt Responsible.

There is no doubt in the minds of the officers that Erich Muenier, alias Frank Holt, or confederates, were responsible for the explosion which occurred at 4:05 o'clock on the afternoon of July 7, the date upon which Muenier predicted that some vessel, of the name of which he appeared uncertain, would be destroyed.

Muenier's plans were frustrated by the fact that his weapon of destruction was placed with miscellaneous freight forward and so was separated by stout bulkheads from an enormous cargo of which, with other inflammable munitions of war intended for the allies, filled the after holds.

## Brings Ship Through Gale.

While the sailors fought the fire, Captain Claret headed his ship for Halifax and brought her safely through a gale and fog to anchor in the lower harbor here at 1 o'clock this afternoon. By that time the flames had eaten their way into No. 4 hold, but late this afternoon it was announced they had been extinguished.

The theory of spontaneous combustion was never entertained, as the explosion was followed by the issuance from the hatches of suffocating fumes which seriously hampered the crew in their fight and which the officers insisted had been let loose by some infernal instrument.

## Crew Tell Thrilling Stories.

Thrilling stories were told by the 100 men who made up the crew of the freighter. The first two days out were uneventful. The Minnehaha sailed from New York for London last Sunday evening. A half hour after midnight on Wednesday morning Captain Claret and his officers were somewhat startled by the receipt of a wireless message warning them that bombs were reported to have been placed in vessels that had sailed from New York for English ports recently. The captain immediately ordered the small boats swung out in readiness for lowering if an explosion occurred. At a quarter after 4 that same afternoon, when the ship was 570 miles southeast of Halifax, something let go in the third compartment and the ship trembled violently. One of the hatch covers shot off, carrying two sailors with it ten feet in the air. One was slightly injured, but the other escaped without a scratch. The crew removed enough of the freight to enable them to get within striking distance of the flames. A steam pipe was inserted and steam driven into the hold. Soon the fire appeared to be under control, but Captain Claret resolved not to take any chances and at 5 o'clock turned his prow toward Halifax.

## Fire Reaches Adjoining Hold.

At night the fire gained headway, finally reaching into the adjoining hold. Throughout the night the crew fought desperately doubtful of the outcome, but determined to stand by to the last. Yesterday they got the upper hand of the flames. Meanwhile the weather became unfavorable and early today a heavy southwest gale arose. This, combined with a thick fog, compelled the steamer to remain off Sambro for some hours and she did not reach anchorage at Quarantine until early afternoon. A high sea was running and boarding the ship was difficult. The crew had mastered the flames when assistance from shore was available.

## SPEED BOAT SINKS.

New York, July 9.—The speed boat Ankle Deep II, turned turtle and sank late today near City Island a short time after she was launched. Her owner, Count Casimir Markowski, of Lake George, N. Y., and two of his engineers were thrown into the water, but were quickly rescued by a steam yacht.

## GERMAN SOUTH AFRICAN FORCES SURRENDER

### FRENCH MAKE ADVANCE OF 700 YARDS IN THE VOSGES

Botha's Victory Is Considered By Military Observers to Have Been a Remarkable Achievement—No Change in Situation on Russian Front.

London, July 9.—The complete surrender of the German forces in German southwest Africa to General Botha, commander of the forces of the Union of South Africa; the French success in the Vosges where they made an advance of 700 yards on a front of 600 yards and captured upwards of 800 unwounded Germans, are the splendid stand being made by the Russians in southern Poland against the Austro-German forces, give the British military critics material for discussion.

## Consider Achievement Remarkable.

General Botha's victory, with the Germans cut off from the rest of the world, was a foregone conclusion but the fact that he won it after five months of warfare, despite the rebellion in his own country and under many natural disadvantages is considered by military observers to have been a remarkable achievement. To gain this victory General Botha's forces had to march in the blistering heat through an almost waterless country in which the few wells had been poisoned and where sandstorms made it necessary for the soldiers to wear goggles.

With rapid sweeping strokes, General Botha worked around the Germans who were forced to surrender or suffer annihilation and thus prevented them from breaking up into parties and waging a guerrilla warfare.

## Territory May Be Annexed.

It is expected that this territory, some 300,000 square miles in extent, will be annexed to the dominion of South Africa. Part of this country, particularly about Luderitz Bay where there are valuable diamond mines, are very rich. General Botha already has begun to send the citizen army home and commencement will be made immediately of the organization of a contingent to assist the mother country in the war in Europe.

## There was little news from the

Russian front today, but the announcements in the American and German official reports that there was no change in the situation was taken to mean that the German armies had not yet recovered from the defeat which the Russians inflicted upon them north of Krasnik, where the Austrians are operating in conjunction with General Von Mackensen. It is uncertain as yet whether Grand Duke Nicholas, commander-in-chief of the Russian forces, intends to make his final stand on his present lines or to fall back to the river Bug which might involve the evacuation of Warsaw. Military men say that this doubtless depends on his supplies of munition which are now reaching him through Archangel and which German submarines are trying to cut off. An underwater boat today sank the Hull steamer Guido, bound for a Russian port, but she was loaded with coal only. A submarine sank also the Russian bark Anna which was bound from Archangel to Hull.

## British Repulse Attacks.

Severe fighting continues at several points on the western front. The British report the repulse of all the German counter attacks that were made in an effort to regain the lost trenches north of Ypres and state that the British gain has been extended and that the German losses were severe.

On the other hand the Germans claim a repulse of the French attacks at Souchez and report that the Teutonic troops have made further progress in the Woerre region where, they state, they captured some trenches and 250 prisoners. However, the French victory in the Vosges appears to be the most important that has occurred on the western front for some months.

The Turks have contributed their attacks on the Gallipoli Peninsula and according to German correspondents have regained some trenches from the British. They have made their appearance also in the vicinity of Aden, the British free port on the south coast of Arabia, where, however, British troops and warships are said to be ready for them.

## WEATHER FORECAST AND TEMPERATURES.

Forecast for Illinois: Unsettled weather Saturday and Sunday, with showers and probably thunderstorms; slightly warmer Saturday in north portion.

## Temperatures.

The current, maximum and minimum temperatures recorded Friday were:		
Jacksonville	73	78
Boston	68	80
Buffalo	64	68
New York	74	78
New Orleans	88	74
Chicago	68	72
Detroit	72	78

St. Paul	70	72
Helen	64	66
San Francisco	62	70
Winnipeg	72	76

## ATTACK VALIDITY OF APPROPRIATIONS

### Suits Are Filed to Restrain Russell from Paying Items Totaling \$2,000,000

## OTHER BILLS TO FOLLOW

### Serious Trouble Looms Ahead For Officials If Court Grants Prayer in the Bills

## THOUSANDS OF DOLLARS PAID

CHICAGO, July 9.—Validity of many of the millions of dollars of appropriations by the legislature is challenged in four bills for injunctions filed in the Sangamon county circuit court at Springfield today to restrain Andrew Russell, state treasurer, from paying specific items totalling close to \$2,000,000. The bills were signed by a taxpayer, John B. Fergus, of Chicago, and were brought by Fayette S. Munro, an attorney and former member of the legislature from Highland Park, with John A. Watson and Robert F. Koll, as counsel.

## Herndon Files Suits.

They were filed with J. H. Brennan, clerk of the circuit court, by Attorney Gray Herndon. Herndon is acting as the Springfield attorney in the case.

Governor Dunne, other high state officials, members of the legislature and officials in general are depicted in the bills and accompanying statement from Mr. Munro as having been in a common camaraderie through the session just closed to mulct the state treasury for illegal increases in their own salaries and perquisites and for the lavish scattering of the public funds.

## To Be Followed by Others.

The bills, according to Mr. Munro, are to be followed by others of even more startling nature for the purpose of tying up more of the \$50,000,000 of appropriations. They also will be amplified to give the court opportunity to pass on the legality of Governor Dunne's act in amending and reducing appropriations, a precedent in vetoes, it is charged, that usurps legislative functions.

One of the sensational features of the bill calls attention to a hitherto little observed senate resolution which provides Lieutenant Governor Barratt O'Hara with a Chicago office at state expense for 1915 and 1916. Its expenses are limited to \$50,000. The resolution was one of the "after hours" thoughts which slipped through according to the present records in the few minutes the senate was in session June 30th to receive Governor Dunne's veto messages. It was a companion to Senator Ettelson's resolution to investigate the Chicago board of education, a back fire against the proposed city council investigation.

## Serious Trouble Looms Ahead.

Serious trouble looms ahead for several state officials if the court grants the prayer in the bills, as thousands of dollars, the appropriation of which is declared illegal, already have been paid out of the state treasury.

The lives of the O'Hara, the Curran, the centennial and similar commissions are also at stake. In an attack on a half million of deficiency appropriations the criminal code is quoted to evidence the petitioners' views of the degree of responsibility which should be placed on the officials who incurred the deficits.

## Summary of Items Specified.

A summary of the items which are specified in the bills show:  
Milage of 200 members, \$26,270.16.  
Nineteen personal injury bills, \$92,681.00.  
Fifteen department deficiency bills, \$458,802.87.  
O'Hara, Chicago office, \$50,000.00.  
Salaries of 461 employees, \$888,339.54.  
Twenty-six omnibus bill items, \$297,567.94.  
Total, \$1,805,701.51.  
The bills take up each item in detail and sets forth why the petitioner believes it "illegal, unlawful, unconstitutional and void", eight varieties of alleged lawbreaking by the legislature, with the sanction of Governor Dunne are referred to as showing how so many alleged invalid "dips" into the state treasury went through the hopper.  
"All News to Me" Says Dunne  
Governor Dunne on reaching Chicago this afternoon from Washington was asked for a statement. "This is all news to me", he said. "But as far as there existed any understanding between state officials and the assembly that is plain rubbish. Of course, I cannot discuss this fully until I have read the bill. Regarding appropriations I can only say that I instructed the chairman of the committee on appropriations to hold everything down and even after this had been done I cut off \$2,000,000."

### Old Ways Sometimes Best.

New methods in farming are immensely ahead of those in vogue years ago but occasionally it is necessary to return to the old way. Al Waterfield of the Sinclair neighborhood has just given an example of this statement by using the cradle method to garner a portion of his wheat field. In the place mentioned the continued rains have made the ground so soft that a binder cannot be used and so to save the grain an old fashioned, cradle has been used. We can be glad about the improvements and blessings of the present day but it is not well to despise the past.

### Germany Denies Responsibility.

A hasty reading of Germany's note to the United States indicates that there are assurances of friendly feeling for this nation, a discussion of various matters not included in the note sent by the Washington government and denial of the claim with reference to the main points at issue, the safety of American citizens upon the high seas, whether passengers upon the ships of neutral or belligerent nations and the sinking of the Lusitania.

It does not seem likely that the note can be considered a "satisfactory" answer to the Washington demands that the rules of international warfare be observed. Yet certain friendly and conciliatory passages in the note will probably result in further discussion and this will be very much to Germany's liking. The Kaiser would be willing to discuss the issues until the end of the war.

### Convict Road Work.

It is likely that the use of convicts for highway work in Missouri may cease. A camp was established about a month ago and everything went well until recently when two of the gang escaped although two guards were on duty all the time. The residents in the vicinity of the camp treated the prisoners to lots of friend chicken and other delicacies, the highway commission provided a graphophone, baseball outfit, fishing tackle, etc., but even all these attractions were not sufficient to make the two prisoners mentioned overlook a chance for escape. But as the tragedy at Joliet three weeks ago has not been permitted to interfere with the honor system there so in Missouri the recent get-away may be charged up rather to a lack of vigilance than to an improper system. The general plan of convict road work has much to commend it.

### The Man Without a Car.

Decatur Herald: The man who is without an automobile and who is forced to depend for transportation upon the plebeian street car, enjoys certain compensations.

He does not have to build a more or less pretentious residence for his vehicle or pay garage charges. He is doubtless taxed something for upkeep, but it never is made in a monthly bill. If his car breaks down he can leave it to be helped out of its difficulty by somebody else; he does not have to stay to toil and perspire while a crowd gathers, nor is his peace disturbed by thoughts of repair bills. Some one presumably cleans out the street car, washes the woodwork when it becomes soiled and paints it when it becomes worn, but about these little details the passenger has no concern.

No policeman holds him up for riding too fast and no judge sentences him to pay a fine. The street car is slow, rather cumbersome and rather wearisome for long distance riding. The inventor of its unspeakable side seats deserves a felon's cell but it does not lend itself readily to joy rides, and only seldom disputes the right of way with light posts and show windows. It has some advantages after all.

### Basic Principles for Fertility.

They had a big picnic at the Funk farms in McLean county yesterday and thousands of farmers gathered there to inspect the methods used in operating and keeping fertile 25,000 acres of land. The fact of coming in close contact and observing results of scientific farming by so many people will have a widespread good effect.

The best part of it all is that while everything is done in a large way at the Funk farms because of the immense acreage, all of the essential principles followed are equally applicable to every eighty acre farm in the state and can be used with proportionately good results. Rotation of crops, the growing of alfalfa, sweet clover or some other legume, the use of lime stone, the securing of phosphorus by the use of phosphate or by means of manure, that's all there is to the whole proposition. But the inspectors at the Funk farms served to verify the

general principles in a very convincing sort of way.

Incidentally it can be mentioned that McLean county farms are no better than those of Morgan county, but more farmers there than here are giving heed to the now recognized principles for making the soil more fertile.

### May Tie Up Funds.

A vast amount of inconvenience will result if the court issues the injunction asked by a Chicago taxpayer to restrain the state treasurer from the payment of certain sums authorized by the legislature and Governor Dunne but the allegations made in the bill filed are illuminating. Several measures have come to light about which the general public had little or no information. Prominent in this list is the resolution providing Chicago offices for Lieut. Governor O'Hara at an expense not to exceed \$50,000 for this year and 1916.

There can be little defense offered for the bill authorizing the payment of more than \$25,000 to legislators as railroad fare refund. Even though the legislators did not expect the Utilities commission to so rule that the railroads could not give them passes there was no good reason why there should ever have been a precedent for legislators' passes and their issuance always had a "bad look."

### OFFICERS RETURN FOUR MEN CHARGED WITH BURLARY

Thought to Be Parties Who Entered Stores at Franklin and Concord—Trials Today.

Sheriff Grant Graff and Deputy Sheriff Harry Norris went to Verdun Friday afternoon and brought back Frank Fisher, James Fisher, Harry Kerns and James Sorrells who are thought to be the men who burglarized several stores in Franklin Tuesday night. The men entered Teaney's restaurant, Kinch's barber shop and the Burlington depot. They secured a quantity of knives, some razors and clothing in Kinch's barber shop and a small amount of money. When captured they had sold all of their plunder except one razor.

It is thought these men are the same ones who have been robbing the railroad stations in Kinderhook, Hulls, Concord and other towns in this vicinity. They will have a hearing before Justice Dyer at 9 o'clock this morning.

### Try Claus' Tea for Ice Tea.

ENTERTAINED CHILDREN.  
Friday afternoon Mr. and Mrs. Frank Tate pleasantly entertained a party of children in honor of their little granddaughter, Gertrude Banks, of Peoria. The time was happily spent in games and various diversions dear to the hearts of the juveniles. During the afternoon delicious refreshments were served and much enjoyed. Little Gertrude expects to leave today for her home accompanied by her grandmother, Mrs. Tate, and Aunt Josephine.

Those present at the party were Grace T. Shaw, Louise Bell, Josephine Lillard, Thora McCall, Vivian Blue, Esther Mae Dugan, Margaret Shannon, James Scott, A. Glass, Theresa Lynch, Beatrice Trumbo, Bob Trumbo, Ruby Parish, Arthur Blue, Jerry Lee Lynch, Merrill Reid, Thomas Campbell, Dailie Tinsley, Edward Mallory, Jr., Frank Mallory, Jr., Scott Timberlake, Geneva Ross, Alexander Ross.

### ATTRACTIVE AND WATERPROOF RAIN COATS FOR MEN ARE SHOWN BY FRANK BYRNS HAT STORE.

ATTY. HAIRGROVE TO TRY COMPENSATION CASE.

William N. Hairgrove will go to Springfield this morning to appear before the industrial board in behalf of Wesley Warren. The case is to be tried under the employers' liability law.

Warren was employed as a car inspector and while at work in the yards at Springfield had an arm cut off and a leg broken. He is suing the company for damages. The company's contention is that Warren's case comes under the Federal liability act. The case will no doubt be followed with considerable interest by railroad officials.

### HELP INSTALLATION.

A joint installation of the Pythian lodges of the city was held Thursday night, John J. Reeve, grand prelate of the Illinois Grand domain, assisting in the work which was in charge of Thomas Six of Waverly. Short addresses were heard following the exercises.

The officers installed follow:  
Favorite Lodge No. 376.  
C. C.—Charles P. Godfrey.  
V. C.—John W. Chipchase.  
Prelate—Fred Jamison.  
M. A.—A. H. Myrick.  
L. G.—J. B. Simpson.  
O. G.—Otto Buhman.  
M. W.—G. L. Masters.  
Jacksonville Lodge No. 151.  
C. C.—Herbert Capps.  
V. C.—John Karl.  
Prelate—Layton McGhee.  
M. A.—Barcoe Barr.  
L. G.—A. E. Williamson.  
O. G.—G. A. Muehlhausen.  
M. W.—Henry Hein.

### IN JUSTICE COURT

Alfred Anderson was arrested on complaint of James Taylor, charged with an assault with a deadly weapon and the case came up in Justice W. T. Dyer's court, Friday. Anderson gave bond for his appearance Wednesday, July 14, at nine o'clock. Both men are farmers residing in the Chapin neighborhood.

### MEETS WITH ACCIDENT.

Robert Large was painfully bruised while painting a residence on North West street Friday morning, when he fell from a scaffold onto a roof.

## LOCAL CITIZENS INSPECT VARIOUS PAVEMENTS IN MISSOURI

Party Much Impressed With Trip, Which Occupied Two Days—South Main Street Residents May Hold Meeting Monday Night.

Mayor H. J. Rodgers, E. M. Henderson, city engineer; Carl H. Weber, secretary Chamber of Commerce; C. W. Boston, W. D. Loneragan, T. H. Buckthorpe and F. M. Morton, who went to Missouri to inspect the various kinds of paving, returned to the city Friday.

They first visited in Springfield, Mo., and came back via St. Louis, where they inspected pavements and in the vicinity of St. Louis. They held conferences with engineers and those connected with the thoroughfares of those places.

The pavements made of tarvia received their special attention, as this kind has been well recommended. In the laying of tarvia the first course is 2 1/2 inches of crushed stone. On top of this is a checked course of 3 1/4 inch of stone. Tarvia heated to 300 degrees is then poured on, the surface being rolled before and after the tarvia is applied. A second coat of tarvia is applied and this is covered with limestone or torpedo sand. The surface when done resembles asphalt.

Mr. Buckthorpe, visiting in Hannibal, Mo., where he was two years ago when tarvia was first laid there. He was impressed with the durability of the composition.

It is not at all unlikely that a meeting of the South Main street property holders will be held at the Jacksonville State hospital Monday night, when reports will be heard from the visitors to Missouri, and further action taken as to the re-topping or otherwise rebuilding of the South Main street pavement.

### MISS ESTHER ORNELLAS

WEDS MR. EDWIN J. FUNK

Miss Esther Ornellas of this city and Mr. Edwin J. Funk of St. Louis, Mo., were married in St. Louis, the Rev. William Hackman of St. Peter's church officiating.

The bride is a daughter of Mr. and Mrs. John Ornellas of this city and Mr. Funk is a salesman for the Day Rubber company of St. Louis. A wedding supper was served in the Cafferatas cafe at Hamilton and Delmar, which was thoroughly enjoyed by all.

The bride and groom are at home to their friends at 214 North Sarah street, Melrose apartments.

### WITH THE SICK.

Mrs. R. K. De Freitas is at home, 1094 North Main street, after being in Passavant hospital for four weeks where she underwent an operation which proved satisfactory.

Mrs. Frank Nunes of 915 North Main street has so far recovered from a sprain she sustained some weeks since that she can now walk without crutches.

Mrs. Mary Cross, 508 South Main street, has been taken to Our Savior's hospital suffering with typhoid fever.

Lewis J. Recker of the Y. M. C. A. has been confined to his home, 858 North Main street, by illness for several days.

Mrs. William Taylor is very ill at the home of her daughter, Mrs. D. L. McCarty, 908 North Main street.

Miss Leta Schaeffer of Meredosia, who has been very ill with tonsillitis is slowly convalescing.

J. A. Obermeyer, the druggist, is confined to his home on North Church street by illness.

Mrs. Elmer Smith of 1043 North Main street is reported better following an illness of several weeks.

Mrs. Mary Seguin of North Main street, who has been ill since December and for 17 weeks a patient at Our Savior's hospital, was out on the streets Thursday for the first time.

The venerable J. L. Rutherford, who has been seriously ill for some time, was able to ride out in an automobile Thursday.

Frank Kiel, who has been ill for the past few weeks, was taken to Passavant hospital Friday.

Joseph De Goevia has received word of the serious illness of his brother, Samuel Goevia, at his home in Chicago. Mr. Goevia was taken ill suddenly and from latest reports there is small chance of recovery.

### ELECTED OFFICERS.

Evergreen Temple International Order of Twelve, Knights of Taber No. 33, held its annual election of officers Friday evening. The following were chosen:

C. M.—Dr. R. H. Beverly.  
V. M.—C. W. Tinsley.  
C. S.—George Clarke.  
A. S.—Roy Rose.  
G. T.—J. R. Scott.  
C. O.—Cornelius Herman.  
C. D. M.—Charles Hogan.  
C. C. B.—Gus Nasby.  
C. B.—Henry Wilborn.

MERRITT WON BALL GAME.  
The Merritt all stars defeated Markham on a heavy field Friday by a score of 3 to 0. Murray pitched a good game for Merritt and fast fielding of both teams prevented scoring. Jewsbury, a southpaw, pitched a good game for Markham but lacked experience. Time of game one hour and fifty-five minutes. Umpires, Coultas and Hanson.

The Merritt team would like to book games with Morgan county teams.

### JACKSONVILLE CIRCUIT.

Hebron—Sunday school at 9:30 a. m. Public worship at 10:30 a. m.

Salem—Sunday school at 2 p. m. Public worship at 3 p. m.

Shiloh—Sunday school at 9:30 a. m.

## The Housewife's Soliloquy

"The health of the household depends on me.  
And that's why I guard it so jealously.  
When I select the meat for pot or pan,  
I invariably go to my Butcher Man;  
For I know all he sells is perfectly good,  
The freshest and best of palatable food;  
And the money I save on the meats I buy.  
Will show how well I can justify  
My claim that it pays to share you see,  
Is the Butcher Man's reciprocity."

### REBEKAH LODGE NO. THIRTEEN HOLDS ANNUAL INSTALLATION

Ceremony Was Held Friday Night—  
Gifts Presented to Mrs. Myrtle Tandy and Miss Fern Haigh.

The installation of officers of Jacksonville Rebekah lodge No. 13, I. O. O. F. was held last night in their hall on East State street. Mrs. Myrtle Tandy, state president, assisted in the installation. She was presented a beautiful spoon by the members, engraved with her initials. Miss Fern Haigh, the retiring Noble grand, was presented with a Rebekah pin.

The officers installed follows: Noble Grand—Grace L. McCarty. Vice Grand—Mayme Berry. Rec. Sec.—Edna Colby. Warden—Adelaide McCarty. Conductor—Edna Colby. Chaplain—Cora Pine. R. S. N. G.—Fern Haigh. L. S. N. G.—Mary Wyatt. R. S. V. G.—Mrs. Ham. L. S. V. G.—Mrs. Mahoney. Inside Guardian—Minnie Woolen.

Outside Guardian—Minnie Suay. Pianist—Ethel Reeve.

After the installation a social hour was enjoyed and refreshments served. The social committee consisted of Lydia Brown Ricks, chairman, Mayme Berry, Carrie Mahoney, Lillian Angelo and Mrs. Charles Batton.

### GERMANY REITERATES OFFER OF IMMUNITY TO NEUTRALS

(Continued from Page One.)

map government, therefore, repeats the assurances that American ships will not be hindered in the prosecution of legitimate shipping and the lives of American citizens in neutral vessels shall not be placed in jeopardy.

In order to exclude any unforeseen dangers to American passenger steamers made possible in view of the conduct of maritime war by Germany's adversaries, German submarines will be instructed to permit the free and safe passage of such passenger steamers, when made recognizable by special markings and notified a reasonable time in advance. The imperial government, however, confidently hopes that the American government will assume to guarantee that these vessels have no contraband on board, details of arrangement for the unhampered passage of these vessels to be agreed upon by the naval authorities of both sides.

In order to furnish adequate facilities for travel across the Atlantic for American citizens the German government submits for consideration a proposal to increase the number of available steamers by installing passenger service a reasonable number of neutral steamers under the American flag, the exact number to be agreed upon under the same condition as the above mentioned American steamers.

"The imperial government believes it can assume that in this manner adequate facilities for travel across the Atlantic Ocean can be afforded American citizens. There would, therefore, appear to be no compelling necessity for American citizens to travel to Europe in time of war on ships carrying any enemy flag. In particular the imperial government is unable to admit that American citizens can protect an enemy ship through the mere fact of their presence on board.

Merely Followed England's Example  
"Germany merely followed England's example when she declared part of the high sea an area of war. Consequently accidents suffered by neutrals on enemy ships in this area of war cannot well be judged differently from accidents to which neutrals are at all times exposed at the seat of war on land when they betake themselves into dangerous localities in spite of previous warnings. If, however, it should not be possible for the American government to require an adequate number of neutral passenger steamers the imperial government is prepared to interpose no objections to the placing under the American flag by the American government of four enemy passenger steamers for passenger traffic between North America and England. Assurances of "free and safe" passage for American passenger steamers would extend to apply under the identical conditions to these formerly hostile passenger steamers.

Recognizes Wilson's Offer.  
"The president of the United States has declared his readiness, in a way deserving of thanks, to communicate and suggest proposals to the government of Great Britain with particular reference to alternation of maritime war. The imperial government will always be glad to make use of the good offices of the president and hopes that his efforts in the present case as well as in the direction of the lofty ideal of freedom of the seas will lead to an understanding.

"The undersigned requests the ambassador to bring the above to the knowledge of the American government and avails himself of the opportunity to renew His Excellency the assurance of his most distinguished consideration.

(Signed) "Von Jagow."

### EXAMINATION OF CHAUFFEURS IN PROGRESS AT COURT HOUSE

Text of the Law Relating to Automobiles and Tests for Drivers.

D. W. Leslie and Ben Cochran representing the Secretary of State's office were in the city Friday and commenced the examination of those required to take out chauffeur's licenses under the state law. The examinations were held in the circuit court room. During the day there was about eighteen applicants for examination. It was desired to publish the list of those taking the examination but Mr. Leslie said that some of those taking the examination did not want their names published.

In conversation with a reporter for the Journal Mr. Leslie said that it was expected that there would be between fifty and sixty to take the examinations here. The examination will last until noon today and those who should take it if they do not appear by that hour will have warrants issued for them under the law.

#### Section of the Law.

Section 13 of the law relating to automobiles and examination of chauffeurs reads as follows:

Sec. 13. License of Chauffeurs.—Renewals.) An application for a license to operate motor vehicles as a chauffeur, which is hereby defined to mean any person operating a motor vehicle as a mechanic or employee, or for hire, may be made by mail or otherwise to the Secretary of State, or his duly authorized agent, upon blanks prepared under his authority. The Secretary of State shall appoint examiners and cause examinations to be held at convenient points throughout the State as often as necessary. Such applications shall be accompanied by the fee provided herein and by a photograph of the applicant in such numbers and forms as the Secretary of State shall prescribe, and such photographs shall have been taken within thirty days prior to the filing of such application. Before a license is granted the applicant shall pass such an examination as to his qualifications as the Secretary of State shall require and no license shall be issued until the Secretary of State, or his authorized agent, is satisfied that the applicant is a proper person to receive it, and no chauffeur's license shall be issued to any person under eighteen years of age. A distinguishing number or mark shall be assigned to each chauffeur to whom a license shall be issued and the license shall be in such form as the Secretary of State may determine; it may contain special restrictions concerning the type of motor car, horse power, design and other features of the motor vehicle which the licensee may operate. It shall contain the distinguishing number or mark assigned to the licensee his name, place of residence and address, a brief description of the licensee for the purpose of identification and a photograph of the licensee. Such distinguishing number or mark shall be of a distinctly different color each year and, in each year shall be of the same color as that of the number plates issued for that year. The holder of every such license shall endorse his usual signature on the margin of the license in a space to be provided for that purpose, immediately upon receipt of said license, which shall not be valid until so endorsed. Every application for a license filed under the provisions of this section shall be sworn to and shall be accompanied by a fee of \$5.00. And all license issued prior to December 31, 1912, shall expire on that date.

Registration of Applicants.  
Upon receipt of such an application, the Secretary shall file the same in his office and register the applicant in a book or index which shall be kept in the same manner as the book or index for the registration of motor vehicles, and when the applicant shall have passed the examination herein provided for, the number or mark assigned to such applicant, together with the fact that such applicant has passed such examination, shall be noted in said book or index, and the name of the applicant shall be furnished to the County Clerk of the county of which the applicant is a resident.

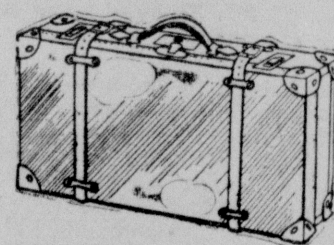

No person shall operate or drive a motor vehicle as a chauffeur upon a public highway of this State after the first day of January, 1912, unless such person shall have completed in all respects with the requirements of this section: Provided, however, that a non-resident chauffeur who has registered under the provisions of the law of a foreign country, State, territory, or federal district of his residence substantially equivalent to the provisions of this section shall be exempt from license hereunder. Such license shall be renewed annually upon the payment of a fee of \$3.00, and shall take effect on the first day of January of each year: Provided, however, that if it shall be made to appear to the satisfaction of the Secretary of State that any chauffeur shall have driven or operated a motor vehicle within this state while under the influence of intoxicating liquor the Secretary of State shall not renew the license of such chauffeur until after the expiration of the period of one year from and after the date of the expiration of the license of any such chauffeur.

Liability of Operator.  
While the law is not clear on the subject the examiners take the ground that the member of a business firm operating a car is liable under the law and should secure a license.

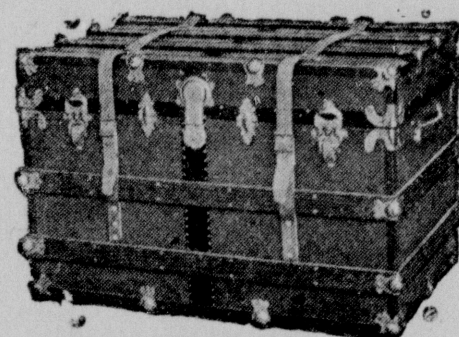

Mr. Leslie said that Judge Mahoney of Chicago in a case in that city where two men were engaged in business and one of them drove

the car all the time while the other looked after the store he should take out a chauffeur's license.

The theory is that the member is drawing salary if he receives a certain amount each week and thereby becomes an employee. It seems to be a rather broad interpretation of the law and there can be found nothing in section 13 that would justify such a ruling.

### WILLIAM AND CLARENCE WAUGH WERE DROWNED AT BLUE ISLAND

Sons of Mr. and Mrs. C. R. Waugh  
Find Watery Grave—Mrs. Waugh  
Formerly Miss Mary Lockman of  
This City.

Edward O'Meara received a telegram Friday morning announcing the deaths of William and Clarence Waugh, aged 9 and 7 years respectively, who were drowned Friday afternoon at Blue Island. The boys were sons of Mr. and Mrs. C. R. Waugh and the mother was formerly Miss Mary Lockman of this county. No particulars of the drowning were received.

### MORTUARY

#### Chance.

Mrs. John Chance died at her home in Riggston, Tuesday night and was buried yesterday in Barrows, Ill. She is survived by her husband and several children.

#### C. W. B. M. MEETING.

The C. W. B. M. met Thursday afternoon at the home of Mrs. Henry Davis on South Kosciusko street with a good attendance. The program was very good and consisted of an interesting talk on the constitution by Mrs. Reeks. Remarks were also made by Mrs. Dabney, Miss Genevieve Haithman and Miss Fannie Grassly.

The guests of the occasion were Miss Fannie Grassly, Mrs. Reeks, Mrs. Edward Burton and Miss Annie Butler.

Officers were elected as follows: President—Mrs. Alice Dabney. Vice president—Mrs. Henry Davis.

Secretary and treasurer—Mrs. Emma Florence.

At the close of business, excellent refreshments were served. The next meeting will be at the Christian church the first Thursday in August at four p. m.

#### BIRTH RECORD.

Born, Thursday, to Mr. and Mrs. Herman Black, residing southwest of the city, a daughter.

#### BURMAN WINS RACE.

Burlington, Ia., July 9.—Bob Burman won the 100-mile automobile race here today on a half mile dirt track; time, 2:07:29. Billy Chandler was second, time 2:14:14. Eddie O'Donnell was third and Tom Alley fourth. Joe Cooper was out of the race early, his car having gone through the fence on a short curve. He was not hurt and his car suffered little damage.

## Boy or Girl? Great Question!

This brings to many minds an old and tried family remedy—an external application known as "Mother's Friend." During the period of expectancy it is applied to the abdominal muscles and is designed to soothe the intricate network of nerves involved. In this manner it has such a splendid influence as to justify its use in all cases of coming motherhood. It has been generally recommended for years and years and those who have used it speak in highest praise of the immense relief it affords. Particularly do the mothers speak of the absence of strain on the ligaments and freedom from those many other distresses which are usually looked forward to with so much concern.

There is no question but what "Mother's Friend" has a marked tendency to relieve the mind and this of itself in addition to the physical relief has given it a very wide popularity among women. It is absolutely safe to use, renders the skin pliable, is penetrating in its nature and is composed of those embrocations best suited to thoroughly lubricate the nerves, muscles, tendons and ligaments involved.

You can obtain "Mother's Friend" at almost any drug store. The regular price is \$1.00 a bottle.

It is prepared only by Bradford Regulator Co., 501 Lamar Bldg., Atlanta, Ga. Avoid the many worthless substitutes. It should be remembered that what is said of "Mother's Friend" is the thought expressed by the thousands of women who have successfully used it and recommended it through two generations.

## HER DEATH NEAR

So Everyone Thought, But Is Now  
Well And Stronger Than Ever.

Newton, Mo.—"I can certainly speak a good word for Cardui, the woman's tonic," says Mrs. Jay Rhoades, of this town. "I suffered for 12 years with my right side, and the last three years, I would have a bad spell with it about every three months. I would get so bad off, every one would think I could not live."

The first of July, I began taking Cardui, the woman's tonic, and I haven't had a bad spell since soon after I began taking it.

Before taking Cardui, I was so irregular, and, at times, I could hardly stand on my feet. Now, I can clean house, and do any kind of work without its hurting me in the least.

Cardui will surely do for other women, what it did for me. I am telling all my neighbors about it."

Cardui is a mild and effective tonic for women, that has been found, by actual use, during more than 50 years, to relieve the ailments to which all women are peculiarly liable.

Card-u-i has helped thousands. Why not you? Try it. NCB

## MARITAL DIFFICULTIES ARE BEING AIRED IN COURT

Daughter of Peter S. Newell, Magazine Illustrator, Former Resident of Jacksonville, Wants Divorce as Does Her Husband.

Peter S. Newell, the gifted artist who will be well remembered by many in this city has been most unhappily in the lime light owing to the troubles of his older daughter. When he left this place he was a short time in Springfield, a longer time in Chicago and later moved to a suburb of New York city and rose to considerable eminence as an illustrator. He lived in Leonia, New Jersey, a suburb of the great city in which he worked.

He had three children, two daughters and a son. When the elder daughter was grown he had a frequent guest who finally persuaded the girl to elope with him and for a long time her parents knew nothing of her whereabouts. Later they discovered she was in Paris and her mother went after her and brought her home.

It seems she married a man named Baker and a special dispatch to the Globe Democrat says:

The marital difficulties of Alfred Z. Baker, an artist, and his wife, Helen L. Baker, daughter of Peter Newell, a magazine illustrator, were disclosed today at the continuation of the trial for divorce, which both seek, before Vice Chancellor Stevenson. Baker charges desertion, and his wife in a counter suit couples that charge with cruelty.

The introduction of letters that passed between the couple consumed considerable time. Their two children, Helen and Alfred J., are frequently mentioned in the letters. Mrs. Newell, mother of Mrs. Baker, was the principal witness. She testified that she had seen her son-in-law under the influence of drink more than once. On Christmas day, 1911 she said, she saw him "crying drunk". She had seen him intoxicated in Nutley, where the couple lived, at meal times, she said. On one of these occasions, she said, Baker bent down his head and insisted that she kiss him.

The father of Mrs. Baker was asked if he ever had told his daughter she must leave Baker or be estranged from her family. He said he had told her that before her marriage to Baker. He had not made such a statement since their marriage he said.

Baker produced as a character witness, Dr. Albert S. Johnson of Nutley, who said he had known Baker for five or six years and had never seen him drunk. The physician testified that in 1911 he had been called to attend Mrs. Baker and found her highly nervous.

## FOUR MORE COUNTIES LIFTED FOR QUARANTINE

New Order Gives Some Relief From Embargo Caused By Foot and Mouth Disease.

Washington, D. C., July 7.—Progress in the campaign in Illinois against the foot and mouth disease has resulted in the lifting by an order effective July 5th of the quarantine entirely from four counties—Carroll, Henry, Stephenson and Whiteside—and the modification of its provisions in other sections of the state. McHenry county and those portions of Dupage county which are not within five miles of the infected premises in Naperville township are now classed as restricted areas, the area in which the quarantine regulations are the least severe of any of the four classes into which the quarantine area is divided. That portion of Dupage county which is within five miles of the infected premises is re-modified area. This is also true of Lee county in which territory not within five miles of the infected premises of Palmyra township is made restricted area while the rest of the township remains a modified area. The effect of the new order is to make the counties of Bureau, Dupage, Lee, McHenry, Ogle, Winnebago, Jo Daviess, and the Union Stock Yards in Cook county the only portions of the state of Illinois which still remain quarantined. None of this area is absolutely closed and the Union Stock Yards is the only portion of it which is classed as exposed area. The counties of McHenry, Ogle and Winnebago are in the modified area and the rest of the territory not specifically mentioned is in the restricted area.

## RODE ON THE WALKS.

The people of our neighbors, South Jacksonville, have some concrete walks which they think are rather fine and they have an ordinance forbidding bicycle riding on them but in spite of the statutes bike riders will persist in taking the smooth track afforded by the walks and the villagers have determined to make an example of some one. J. D. Pike, arrested an offender who will be haled before Squire Dyer at an early date and made to pay for his fun.

## ATTENDED FUNERAL.

The following from out of town attended the funeral of Mrs. Mary J. Wilhite. Mrs. Belle Wilson, Mrs. J. C. Welch of Tallula; Mrs. William Shastid, Pittsfield; Mrs. Howard Wilson, Virden; Mr. and Mrs. Harry Daniels, Mr. and Mrs. William Daniels and sons, Howard and Byron, Mr. and Mrs. E. C. Maurer, Mr. and Mrs. J. W. Maurer, Mr. and Mrs. Charles Hender, Ashland and Mrs. Belle Wilson, Mrs. Beards-town.

## POSTPONED PICNIC.

On account of the unsettled condition of the weather, the Socialists of this city have postponed the proposed picnic that was to be held at Nichols park on Sunday, July 11th. The date on which it will be held will be announced later.

## THE EFFECTS OF ALCOHOL ON MODERATE DRINKERS

Some Startling Facts Given by Actuaries of Prominent Life Insurance Companies.

The June 30 edition of the Outlook contains an article on moderate drinking which is indeed startling. It is not the production of any temperance society, local option advocates or prohibition people, but cold statistics from several million policy holders in leading life insurance companies.

The writer of the article says that in 1842 an Englishman who was a total abstainer had to pay 10 per cent more for his life policy because he drank nothing intoxicating, but he lived to be 82. In December, 1814, at a convention of presidents of life insurance companies, a paper was read by an experienced actuary stating that liquor dealers are the most hazardous risks and even very moderate drinkers are unsafe, and this after a thorough investigation and very careful inquiry. Now most first class companies will not insure retail liquor dealers, only limited cases of wholesale dealers; will not insure employees in distilleries, grocers having bars, traveling salesmen for liquor houses and restaurant keepers who serve liquors are undesirable risks. These men are excluded because of the temptation to drink. Another investigation showed among a large number who had at one time drank to excess, but who had fully reformed there were under certain circumstances 289 deaths, where under normal conditions there would have been 190 deaths.

Then there was an investigation with two classes and a large number to make it fair. One class took two glasses of beer or a glass of whisky a day. Another class took more than that, but were not at all considered drinkers to excess, and the mortality among the latter was 50 per cent greater than among the former.

Another investigation was among men who took four glasses of beer or enough whisky to make two ounces of alcohol, say about four ordinary drams of whisky, and the deaths were from cirrhosis of the liver five times normal and from diabetes, tuberculosis, pneumonia and suicide twice normal.

Another actuary gave the results of fifty years' experience in a large company. In 466,941 lives of non-abstainers insured there were 8,911 deaths to be expected according to the mortality tables and there were 8,947, about 100.4 per cent of the expectation.

In 398,015 lives of abstainers there were 6,809 deaths to be expected, according to the mortality tables, and there were actually 5,124, or 74.3 per cent of the number, against 100.4 per cent of non-abstainers.

An English company reports in a period of 1884-1910, 1,451.9 deaths to be expected, but they were abstainers and there were but 629 deaths.

Another company reports during a period of 27 years there were 2,311 deaths to be expected, but they were abstainers and the deaths were 1,214.

Another statistician has found in a large number of risks comparative deaths:

Ages.	Total	Moderate
	abstainers.	drinkers.
30-40	4,201	4,677
40-50	4,201	7,041
50-60	6,246	19,861
60-70	13,056	18,524
70-80	29,078	34,568

## A SLIGHTLY DIFFERENT SITE FOR CHAUTAQUA TENT

The prospects for a large attendance at the Chautauqua this year are very bright and already a large number of people have asked for tent space and there is some anxiety regarding the ability of the management to assign all campers desirable positions. Yesterday morning some of the Chautauqua people and some of the park board went out to Nichols park and looked over the ground informally and all were unanimously decided that it would be wise to pitch the large tent on the slope just above or south of the small pool. The slope of the ground is ideal and it is free from trees, so that there will be no trouble on that score.

Then, too, it will save several rods of walking from the end of the street car track and will leave a large and highly desirable space among the trees in the former location for campers.

Steps are also being taken to supply better toilet facilities than were had last year by Chautauqua campers and the work will doubtless be accomplished in due season.

## IMPROVEMENT AT NICHOLS PARK INJURED

In order to make a good driveway across the lagoon to the ball grounds the Nichols park board employed a force of men and teams and had all put in good order and teams and automobiles crossed at ease during the fifth, but the fearful rain came later and washed away a lot of the grading so expensively done. The trouble will be remedied just as soon as possible, though the funds at the command of the board will not permit any extra expenditure.

## BIDS ARE ASKED.

Sealed bids will be received by the county commissioners of Morgan county for the construction of two concrete bridges located on the county line between Scott and Morgan counties, near Neeleyville, until the hour of two p. m. Saturday, July 17, 1915. Each bid must be accompanied by a certified check for the sum of \$50, payable to said commissioners. Each bid must be marked "Proposal for Highway Bridge Work", and addressed to the county clerk, Jacksonville, Illinois. For plans and further information address L. O. Baldwin, Jacksonville, Illinois.

## NEW LAW RELATIVE TO INSPECTIONS OF SCHOOL HOUSES

State to Furnish Plans and Specifications for All School Buildings—Reports Must be Made.

The new law just passed relative to state inspection of school buildings contains some interesting and important factors. It reads as follows:

### Public Safety.

"To prepare with the advice of the state board of health, the state architect and the state fire marshal, for school directors and boards of education specification, for the minimum requirements for the heating, ventilation, lighting, seating, water supply, toilets and safety against fire, which will conserve the health and safety of the children attending the public schools.

"To inspect the plans and specifications for the heating, ventilation, lighting, water supply, toilets and safety against fire for public school rooms and buildings submitted to him by boards of education or boards of directors and to approve all those which comply substantially with the specifications prepared and published by the superintendent of public instruction.

"To inspect all public schools under this supervision and report in writing before the first day of April the board of school trustees of other boards exercising similar functions, whether the several schools in their jurisdiction have or have not been kept as required by law.

"To request state board of health, the state fire marshal, or the state architect to inspect school buildings which appear to him to be unsafe, insanitary or unfit for occupancy. It shall be the duty of these officials to inspect such buildings and state in writing in what particular they are unsafe, insanitary or unfit for occupancy.

"Upon the receipt of such statements the county superintendent shall condemn the buildings and notify in writing the board of directors or board of education, stating specifically the reasons for such condemnation. He shall also notify in writing the board of school trustees of the school so condemned if not kept as required by law.

### Funds to be Withheld.

"When the board of trustees has had notice from the county superintendent of schools that a district has not kept school as required by law the parts of the distributive fund apportioned to such district shall be withheld until the county superintendent has given notice in writing that the requirements of the law have been complied with. The amount withheld shall then be placed to the credit of such district.

"Provided, in cases where the school houses are already in use for school purposes July 1, 1915, and do not comply with the minimum requirements for the health and safety of the pupils as set forth by the superintendent of public instruction, the distributive fund shall not be withheld until after March 1, 1917.

"Before erecting or remodeling a public school building the board of directors or board of education in districts containing fewer than 10,000 inhabitants shall submit the plans and specifications respecting heating, ventilation, lighting, seating, water supply, toilets and safety against fire to the county superintendent of schools for his approval."

## NOTES.

The following rap and interesting story of two Chicago flies was read by a member of the Little Mother's club of the Hammond School at the public demonstration of work, June 3, 1915. Here it is: Two Chicago flies met one day. The first fly was a thin and listless house fly. He said, "Good by, old chap, I am leaving Chicago forever. Times are hard. One can hardly get enough to eat. Our homes in the manure piles are being destroyed; garbage cans are being covered; people put screens in their windows and doors. Only last week my brother was killed by a 'Swatter', and my oldest sister had her wing broken when she tripped and fell into some sticky fly paper."

"You're not the only fly having trouble," said the second house fly. "The war in Europe is nothing compared with the war against flies and mosquitoes in Chicago. Even the school children are fighting us. They refuse to buy fruit and candy that is not protected from flies by netting. Housewives fight us. This afternoon I lit on a baby asleep in its crib and bit the child. Then I walked on the nipple of the nursing bottle. I think this was the meanest thing I have ever done, because you know my feet and wings are always covered with all sorts of disease carrying germs. So, if you are going away now, I will fly away with you, for Chicago is no place for a fly."

### Grain Binders.

The average life of a grain binder is only about 100 years, or 20 days for each of five years. The life of a binder will be lengthened if good care is given it. A few days before grain harvesting begins the binder should be overhauled and put in as good condition as possible. See that the guards are tight and in line, that badly nicked or broken sections and ledger plates are replaced by new ones, that the clips are so adjusted that the sickle is held firmly and makes a true shearing cut, that the knife of the binder attachment is sharp, and that all parts are well oiled.

The Misses Markham, residents of Chapin, were in the city yesterday.

## CROP CONDITIONS IN ILLINOIS.

A slight increase in the area planted to corn for the 1915 crop is reported. In the northern and southern divisions of the state, the area is 101 per cent as compared with last year and 100 per cent in central Illinois.

The June 20th condition of corn is 81 per cent of normal in northern and southern Illinois and 80 per cent in central Illinois, a state average of 84 per cent. Corn has made slow growth owing to cool weather and excessive rainfall. Several counties in the northern division report damage to corn from cut, wire and grub worms and a dozen counties in the state report a few chinchbugs still with them.

The June 20th condition of winter wheat in northern Illinois was 100 per cent of normal, in central Illinois 95 per cent, in southern Illinois 76 per cent, a state average of 90 per cent. Hessian fly is reported from nearly every county in the central and southern divisions of the state.

The condition of oats on June 20 was the best in years, 99 per cent or normal, which is 38 points better than the June 20th condition of 1914.

The condition of rye on June 20 was 94 per cent of normal, being 96 per cent in northern Illinois, 97 per cent in central Illinois and 89 per cent in the southern division of the state.

There is a decrease of 5 per cent in the area of meadows as compared with 1914. The June 20th condition was 90 per cent of normal, which is 26 points better than their condition of a year ago.

The condition of alfalfa in north-

ern Illinois on June 20th was 100 per cent of normal, in central Illinois 98 per cent and in southern Illinois 97 per cent.

The area of pastures is 96 per cent as compared with 1914. Pastures are reported in fine shape, their June 20th condition being 96 per cent of normal, which is 25 points better than their condition on the same date last year.

According to the reports, of our correspondents on June 20th, the prospect is most encouraging for big yield of apples, but the peach crop will be light. The condition of small fruit is reported good and the yield larger than for several years.

## GROWTH OF AMERICAN MERCHANT MARINE.

Merchant vessels built in the United States and officially numbered by the Bureau of Navigation, Department of Commerce, during the fiscal year ended June 30, 1915, were 1226 of 215,711 gross tons compared with 1291 of 311,578 gross tons for the fiscal year 1914. During the past ten months, however, under the Ship Registry Act of August 18, 1914, to the American merchant fleet, 147 foreign-built vessels of 528,907 gross tons have been added, making the total for the year from both sources, 1,373 vessels of 744,618 gross tons.

This tonnage is the largest annual addition to the American merchant fleet in the history of the United States. In 1908 the total increase was 718,683 gross tons, in 1907, it was 596,708 gross tons, and in 1855 it was 586,102 gross tons.

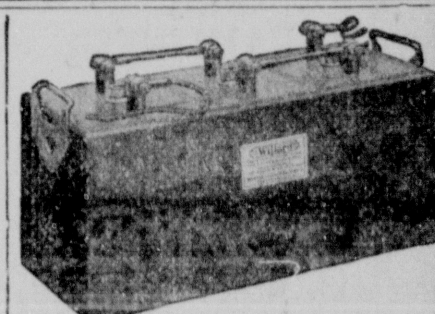

The losses to the merchant fleet for the past year have not all been reported, but for the first nine months they number 1062 vessels of 195,052 gross tons.

Mrs. Martin Ryan of Clements was among the shoppers in the city yesterday.

## WASTED WEALTH

A man indignant waxes, when he beholds the waste of coin he pays for taxes, all squandered or misplaced. Out on the western prairies the toiler's wealth is heaved at robins and canaries, and he, of course, is peeved. It goes for pewter bridges, which break beneath a load; it goes for plowing ridges and grading up the road. It goes for bum repairing of highway and of hill, and so we hear him swearing, the man who pays the bill. He seeks the county fathers, the men who spend the change, and vexes them and bothers their souls with questions strange. "Why don't you grade the ridges with permanent intent? Why don't you build us bridges of granite or cement? We all would be in clover if lasting roads were made, but over, still, and over, you plow and scrape and grade, you make your culvert wooden, and build your bridge of tin; contractors have a puddin', the strong-box wading in." But useless is his kicking, the poor tax-paying man; the county dads are sticking to their old futile plan; still building bridges rotten, and roads that wash away, all but the bills forgotten, the bills the workers pay.

We carry full line of repairs for all kinds of batteries, and are prepared to repair and charge all makes. Satisfaction guaranteed.

## DODGERS DEFEAT CUBS IN TEN INNING BATTLE

### BROOKLYN OVERCOMES A SIX RUN LEAD.

Chicagoans Knock Pfeffer Out of Box in Fourth, But Rucker Keeps the Hits Scattered—Pierce is Knocked From Mound in Sixth.

Brooklyn, July 9.—Brooklyn overcame a six run lead and beat Chicago in the first clash of the series after battling for ten innings. The visitors knocked Pfeffer out of the box in the fourth, but Rucker kept the hits scattered. Brooklyn batted Pierce from the mound in the sixth.

## BUFFALO WINS BOTH ENDS OF DOUBLE HEADER FROM BROOKLYN

Pittsburgh and St. Louis Break Even in Double Bill.

Brooklyn, July 9.—Buffalo won both ends of a double header from Brooklyn. In the first contest Brooklyn led up to the eighth when Buffalo drove Seaton from the mound. The second game was a walkover for LaFitte.

Score: R. H. E.  
First game:  
Buffalo . . . 000 010 061—8 15 3  
Brooklyn . . . 010 000 100—2 8 4  
Schulz, Bedient and Blair, Allen; Seaton, Frank Smith and Simon.  
Second game:  
Buffalo . . . 000 014 310—9 44 2  
Brooklyn . . . 100 000 000—1 6 2  
LaFitte and Blair; Fineran, Frank Smith and Land, Wright.  
St. Louis, 2-5; Pittsburgh, 4-0.

Pittsburgh, July 9.—Pittsburgh and St. Louis broke even in a double bill. Crandall pitching for visitors in the first game was hit hard while Allen for the locals was very effective. In the final game Groom allowed only three hits.

Score: R. H. E.  
First game:  
St. Louis . . . 000 000 020—2 9 1  
Pittsburgh . . . 200 110 00x—4 13 1  
Crandall and Hartley; Allen and O'Connor.

Second game:  
St. Louis . . . 020 010 101—5 12 0  
Pittsburgh . . . 000 000 000—0 3 0  
Groom and Hartley; Rogge and Berry.

Harry Williams of the Cubs made two home runs in the game. O'Meara of the Dodgers made two hits, two runs, had three putouts and seven assists and no errors.

## SOX DOWN SENATORS IN FIRST OF SERIES

### CLINCH GAME IN SECOND WITH TWO RUNS.

Fournier's Triple and J. Collins' Steal of Third and Home Bring in the Two Tallies—Scott Tightens When Visitors Threaten to Count.

Chicago, July 9.—Chicago defeated Washington in the first game of the series. The locals won in the second on Fournier's triple and J. Collins' single and his steal of third and home. Scott tightened when the visitors threatened to count.

Philadelphia . . . 010 001 001—3 8 0  
St. Louis . . . 000 001 000—1 3 0

Busa and Lapp; James and Agnew, Severoid.

## "MORNING GLANCES" (By Gosh)

The White Sox won from Washington yesterday by a score of 5 to 1. The Sox hit Shaw and Ayres opportunely and ran wild on the bases. Fournier's triple and J. Collins' steal of third and home won the game for the Sox.

Washington got eight hits off of Scott but could not bunt them while he received great support in the field from his mates.

The Braves beat the Cardinals in ten innings at Boston. Butler's wild throw to first in the tenth permitted the Braves to win. In the second inning Doak passed Gowdy with two men on and filled the bases. He then lost control and passed the next two men and forced in two runs.

The idea of passing a strong hitter to get up a weak man has not been panning out well of late. A few days ago Faber passed Bush of Detroit and brought Baker up with the bases full. He lost control and passed Baker thus losing his game.

### WANTED

WANTED—To buy, some young calves. Call Illinois phone 986. 7-2-1f

WANTED—A barn, outhouse, sheds and used lumber. Will pay cash and remove at once. The Johnson Agency. 7-2-1f

WANTED—By refined and educated young lady, children to care for by the hour, day or week at reasonable rates. Call Bell 604. 7-8-3f

## HELP WANTED

WANTED—Pin setters at Schumm's Bowling alleys. 7-7-1f

WANTED—At Jacksonville Candy company, experienced girl assistant with good references. 7-8-3f

WANTED—Nursery agents in every town. Start now. Outfit free. First National Nurseries, Rochester, N. Y. 7-10-1f

BRAND MANAGERS—Large oil company is establishing distribution in plants in towns of 2,000 or over. Salary and commission. Experience unnecessary. Managers should earn from \$2,000 to \$5,000 yearly. Must invest \$2,000 which is fully secured. Call or write, Manager, 1048 Otis Bldg., Chicago. 7-4-6f

COUNTY AGENTS WANTED—The Meyers Auto Tire Safety Valve stops the trouble—the demand for new tires. We're talking to you now. We may not prove popular with tire manufacturers, but our valve will fit anybody's tire. You want the tire to last. You may have the most expensive car on the market, but when your tires go wrong, joy ceases. Hundreds of inventions are for betterment and pleasure of motoring, but the Meyers Auto Tire Safety Valve is the first practical one for regulation of pressure. It means exactly to an auto what a safety valve means to a locomotive, thrasher engine, or any other container of high fluctuating pressure. The principle, the valve, the material and the results are the same. It takes care of over-inflation by carelessness in pumping up, and high pressure from heat and friction. It prolongs the life of new tires and insures the old ones. It saves you time, money and patience and does more toward reducing your upkeep than any other invention of the automobile age. Exclusive county contracts let to wide-awake men. For information address J. P. Coley, Streator, Illinois. 7-4-6f

FOR RENT—Houses always. The Johnson Agency. 7-1-1f

FOR RENT—Furnished room. 322 West College ave. 6-6-1f

FOR RENT—6 room house. Apply 227 Lorton Street. 6-16-1f

GETTING PROFIT  
FROM THE DAIRYBUSINESS MUST BE SKILLFULLY  
HANDLED TO BRING RIGHT  
RESULTS.Idea of Operation as a Side Issue  
Not Justified by the Results—  
Farm of Today Is Commercialized  
and Dairying Is Thus Presented  
in a Different Aspect.By W. J. Fraser,  
Dairy Farming, University of Illinois.What is dairy farming? Is it a  
real business and a man's job,  
requiring brains, management and  
skill of a high order, or is it simply  
a side issue, an adjunct of farming  
affording the women and children  
the means of getting a little pin  
money?Most people are likely to consider  
it the latter. And so it was in the  
early days, when farming was carried  
on simply to secure a bare living.  
Today the farm has become  
largely commercialized. Many people  
are farming for the purpose of  
making money, and under these circumstances the questions of good  
and poor cows and good and poor  
feed becomes vital. A cow that does  
not pay a profit over her feed and  
keep is an absolute drawback to the  
commercial dairyman, because he  
actually loses money on each one  
of this kind in his herd, and the  
more he has of them the worse off  
he is. Success now depends almost  
entirely upon the brains, judgment  
and business ability of the dairyman.  
Simply cutting down expenses  
will no longer do.Dairying needs readjustment. We  
must keep dairy cows instead  
of just cows. We must have  
dairy knowledge, instead of doing  
as father did. Most dairymen  
have only a vague and confused idea  
as to what really determines their  
profits. Large sums of money are  
invested in land, in extensive and  
expensive buildings, costly horses,  
tools and machinery, high-priced  
feed and labor. Then all this outlay  
is turned to raising crops that  
do not yield anything like the  
amount of digestible nutrients per  
acre that should and could be obtained,  
and to feeding and caring  
for a herd of cows utterly unable  
to return a profit because of inefficiency  
and poor care. The same money  
and labor expended in an intelligent  
manner upon the same farm  
and efficient dairy herd would  
return a most handsome profit.One Failed, the Other Paid Out.  
The chief obstacle to progressive  
dairying lies in carrying it on in a  
shipboard manner without well-balanced,  
intensive method. Many dairymen  
try to make money without  
applying business principles. The  
milk producer must stop guessing;  
he must know for sure what will be  
the results of different operations  
conducted in different ways and then  
adopt the ones that will return the  
greatest profit. It is the net result  
from a cow that tells whether she  
is making a profit or not. And no  
man, no matter how good a judge  
of dairy conformation, can know  
what that net result is if he does  
not keep a record.A great part of the cows milked  
each day are kept by men who are  
simply cow keepers, not dairymen.  
Even on what would be considered  
good dairy farms there is frequently  
aimless breeding, thoughtless and  
shiftless feeding, care and housing.  
All of which results in lack of sufficient  
returns. What a picture is the  
following, from a recent letter  
written by a resident of Illinois:"Within a radius of ten miles  
from where I have lived for thirty  
years there are produced annually at  
least 300,000,000 pounds of milk—  
an average of ten eight-gallon cans  
a day for every quarter section—under  
conditions of such deplorable ignorance  
that I cannot find adequate  
comparison for them. Not one dairyman  
in twenty has anything like a true  
conception of the production of his  
individual cows. I cannot think  
now of one who is making tests to  
know if each cow is profitable or  
the reverse. Again, where great ignorance  
such as this prevails, great  
filth goes with it, hand in hand."Farms have been made and lost  
in the dairy business—both more  
frequently than is supposed. I know  
several instances where men of good  
habits started with farms paid for  
and lost them in dairying, either because  
of poor cows, poor feeding,  
poorly chosen crops or through poor  
judgment, or a combination of these.  
I also know many dairymen who  
started with nothing and at the present  
time have good farms, which  
they have paid for by the sale of  
dairy products.One man owned a farm of 120  
acres. He kept 20 cows and employed  
two men to help him in the work.  
The expenses so greatly exceeded the  
income that the farm was finally  
lost. Then the farm was purchased  
by another man. He kept three  
hired men and 65 cows on the same  
120 acres of land, producing 30 cans  
of milk a day during the flush of  
the season. His milk for one month,  
shortly after he began, brought  
\$840. This is an example of brain  
fertility, not soil fertility, for the  
soil was the same.As a broader illustration of the  
great difference between dairymen  
in their ability to make money, the following  
figures are taken from actual  
records collected during the  
past year from more than 300 dairy  
farms of all grades in one community:Three dairymen made more than  
\$5,000 above all expenses, including  
interest on the investment; eight,  
including the first three, made morethan \$3,000, and twenty made more  
than \$2,000. Two dairymen lost  
more than \$1,500 each, and ten, including  
the two biggest losers, lost  
more than \$1,000 each. There was  
an actual difference in earning capacity  
between the highest profit and the  
greatest loss of more than \$6,700.  
There is a difference between the  
eight highest and ten lowest of  
more than \$4,000 each annually.Every dairyman should ask himself  
questions of every cow in his herd these  
questions:How much milk and how much  
butter fat does she produce a year?  
What is the cost of her feed for  
one year?Of the labor?  
Of both?What profit does she return each  
year?How much is she worth to me?  
Are the net returns so low that  
she should be replaced?

N. B. in Country Gentleman.

CONTROLLING MELON LICE  
IS NOT DIFFICULT MATTERSolution Containing Black Leaf can  
be Successfully Applied in Battling  
Pest.(By C. E. Durst, Associate in Olericulture,  
University of Illinois.)During the past twelve years the  
Department of Horticulture of the  
University of Illinois has employed  
a number of materials and methods  
for combating melon lice. The best  
results, by far, have been obtained  
with "Black Leaf 40," which has  
been used since 1910. A solution  
containing one part of the material  
in 1000 of water will successfully  
control the life if properly applied.  
If particularly quick results are  
desired, it may be advisable to use a  
stronger solution. The material may  
be used as strong as one part to  
300 of water, without injury to melon  
foliage.It is very important that the material  
be properly applied. Because of the  
fact that the lice live by sucking  
the juices from the plant, it is  
necessary that their bodies be hit  
with the spray if they are to be killed,  
and as they live mainly on the  
under surface of the leaves, they are  
not easily reached. At this station  
a barrel pump fitted with lead of  
hose, 8 foot bamboo rod and nozzle  
with bent shank and fine cap, was  
successfully used for making the application.  
Any outfit capable of  
throwing a fine spray with reasonable  
force may be used with equal  
success. The type of nozzle is especially  
important. It should have a  
bent shank so that the under-  
surface of the leaves may be reached;  
and it should have a fine cap in  
order that the material may be distributed  
as a very fine mist. A single  
Vermorel nozzle will be found  
particularly adapted to the purpose  
for the reason that it throws a finer  
mist near the opening than some  
nozzles.In applying this spray, high pressure  
should be maintained and the  
nozzle should be carefully moved  
about under and between the leaves.  
With due care in handling the  
nozzle it is possible to reach practically  
every insect on the plants.  
"Black Leaf 40" solution is apparently  
so destructive to the lice that  
the finest mist coming in contact  
with their bodies is capable of killing  
them.It will be found easiest to apply  
the spray to melon and cucumber  
vines that have been "rowed." This  
operation consists simply in turning  
the growing shoots early in the season  
so that they will run in the direction  
of the row. It is feasible, however,  
to treat vines for lice that have not  
been "rowed," though the more  
time and material are required."Black Leaf 40" is a commercial  
preparation of nicotine sulphate containing  
40 per cent nicotine, manufactured  
by the Kentucky Tobacco  
Product Co., Louisville, Kentucky.  
It is sold in cans of various sizes  
as follows:10 1-2 pounds costing \$12.50;  
2 1-2 pounds costing \$3.25; 1-2  
pound costing 85 cents.A 10 1-2 pound can contains practically  
one gallon of "Black Leaf 40."  
For spraying an acre of "rowed"  
melons, about 20 gallons of dilute  
solution are required. Thus, the  
material for spraying an acre of  
melons with 1 to 1000 solution  
will cost approximately \$2.50. The  
expense will vary from this, with  
the size of the vines and the method  
of training used.

## Feed the Cows.

Some farmers (but probably none  
in this country) believe that a cow  
will make up as a horse the growth  
that it does not make as a cow. As  
a matter of fact a cow or other young  
animal, that is not kept growing  
is very likely never to become  
as large and strong as it would  
have been had it thrived while young.  
The cow should receive the proper  
kind of feed and be fed liberally.  
The feed should be nutritious and  
palatable. Among the best cow feeds  
is fresh pasture grass. This should  
be supplied with oilmeal, corn, oats,  
bran and alfalfa or clover hay.Where it is possible to do so the  
cows should be kept in the stable  
away from flies during the day, given  
all the alfalfa or clover hay they  
will eat, and one pound of the following  
grain mixture to each one  
hundred pounds of cows: 6 pounds  
of oats or corn, 3 pounds of bran,  
and 1 pound of oilmeal.—Suggested  
by Ohio Press Bulletin.FIRE ONE OF WORLD'S  
GREATEST SCOURGESGREATEST SCOURGES STATE  
FIRE MARSHALL TELLS OF  
ENORMOUS LOSSES.Preservation of Property Often Possible  
if Proper Care is Taken—  
Great Needless Waste Occurs Annually—  
Errors on Construction Often Costly.(By Walter H. Bennett, Illinois  
State Fire Marshall.)We are at the present day living  
at a time in the history of our country  
when the question of the preservation  
of resources, natural and otherwise,  
is receiving a great deal of attention,  
both from the National Government  
and our own state as well. (Waterways and water-power  
are being developed and utilized,  
forests are being preserved; fish  
and game retreats are being established  
and enlarged; and arid places  
are being reclaimed and made to  
blossom as the rose. The demands  
upon the country's resources  
have been mightily increased in the  
last year because of the unprecedented  
war upon the continent of Europe;  
and it is likely that these demands  
will be further increased in the  
years to come.It therefore seems to me that the  
question of the preservation of all  
sorts of property from any sort of  
extravagant or needless waste,  
should receive a kindly reception  
from the general public.Fire has always been the master  
scourge of the world. All of the  
great cities of ancient times had  
their visitations of fire. We read  
in history of the destruction of Nineveh,  
Babylon, Smyrna, Herculaneum,  
Constantinople and Rome. In fact,  
these cities were destroyed about  
as rapidly as they could be rebuilt,  
and it seems that we have profited  
very little from the experience  
of the past and are still constructing  
our cities in a manner to invite  
destruction by fire. We build  
and burn, and build and burn, and  
then build and burn again, and this  
un guarded menace of fire is stalking  
over our entire land claiming its  
toll of human life and property,  
sending up its pillar of cloud day  
by day, and its pillar of fire by  
night, and sacrificing on its altar  
property to the value of \$500 every  
minute. We burn up each year  
half as much as we build, and one  
prominent speaker has depicted this  
fire loss in the following manner:  
He said: "If an artist were to portray  
this awful spectacle, he would be  
called upon to paint a picture of  
burning buildings lining both  
sides of a street reaching from the  
city of Chicago to the city of New  
York, and every 500 feet would  
show a man, woman or child severely  
burned or injured, and every  
quarter of a mile, the charred  
remains of some one sacrificed to this  
red plague."Much has been written and spoken  
concerning the tremendous fire  
waste of this nation. There is no  
complete measurement of it, but the  
partial and inadequate figures  
obtainable make it an appalling total.  
The estimated average annual  
loss covering a period of the last  
ten years is about \$300,000,000,  
and with the growth of population  
and wealth this amount is steadily  
increasing. Moreover, it represents  
a real and absolute loss, it does  
not and cannot replace the property  
which has been destroyed. That has  
gone forever in smoke and ashes.The insurance companies of this  
country are not philanthropists.  
They do not reimburse the state or  
nation for this loss by fire. They  
simply take your money and mine,  
paid in as insurance premiums, and  
reimburse the individual loser. Every  
time there is a fire loss there is  
so much human effort, so much material  
wealth, so much energy lost forever.The per capita fire loss in this  
country is about \$3 each for every  
man, woman and child, and is the  
heaviest tax that has to be borne  
by the American people. You may  
contend that you carry no fire insurance,  
that your buildings are reasonably  
safe, and for that reason it is not  
necessary for you to carry it, consequently  
you are not directly interested in this  
fire loss. But let us consider a moment.  
Every merchant figures into the cost  
of goods purchased a certain amount  
for fire insurance. This is added to  
the price and is paid by the ultimate  
purchaser. The farmer, perhaps  
carries fire insurance on the wheat  
in his granary. The grain dealer  
carries insurance on the grain in his  
elevator. He figures the cost of his  
insurance into the original cost of the grain.  
The baker himself carries fire insurance,  
and so every purchaser of a loaf of  
bread pays his proportionate amount  
of all of the fire insurance which has  
been carried on this agricultural product.KERNELS FROM KORN BELT  
(By Sol R. Quizer.)A man is seldom better than his  
mother's ideals.  
Pay as you go and then you won't  
have to go until it pays you.  
The hen that makes roosts of the  
farm machines.  
That ought to be under a shed.  
Belongs to the man who'll forever  
stay poor.  
Before he'll make use of his head.HOME AND HOUSE  
PROBLEMS ARE MANYMANY BOYS AND GIRLS LEAVE  
FARMS BECAUSE OF DESIRE  
FOR AMUSEMENT.Food and Health Laws Must Be Observed  
for Benefit of Household  
and the Community as Well—  
Suggestions That May Aid in  
Keeping Help.(By Mamie Bunch, Department of  
Home Economics Extension,  
University of Illinois.—Article III.)When a home is conveniently  
equipped it is not so difficult to  
keep help, or to keep the children  
at home. What is the attitude of  
your home toward the neighborhood,  
in enforcing the health laws? Is the  
pure food laws? Is the disposal  
of your garbage and sewage in the  
neighborhood a menace to you? What  
have you done about it? Have the  
young folk in your neighborhood  
any organized pleasures, games,  
athletics, social or improvement  
clubs? Do they feel your interest  
and fellowship in their pleasures?  
What are you doing personally  
more attractive to the young people,  
the girls especially?When every year thousands of  
girls leave the farm to work in  
city stores, factories, and shops, or  
take stenographic positions in men's  
offices, the conditions of the homes  
from which they come need investigation.  
Here are some reasons such girls  
have given me:"A woman has so much hard  
drudgery on the farm, carrying  
fuel and water, keeping up fires, so  
much cooking, washing, ironing.""We have no money of our own  
to spend. It is so humiliating to  
ask for money.""The young men on the farm are  
not careful to keep clean.""It is too dull and monotonous.  
There is too little social life.""There is nothing pretty. Oh,  
maybe the woods and clouds, but  
when you have to look at them over  
a nasty pig pen or front yard over-  
grown with weeds, the ugliness is  
more impressive than the beauty."Now if we are going to keep  
women on the farms and make girls  
love farm life we must free the  
women from their home issues.  
For that reason strong emphasis is  
placed, in Home Economics courses,  
on systematizing house work; on  
eliminating unnecessary details; on  
good equipment (there's a lot of  
truth in the old adage, "A workman  
is known by his tools"). What  
would we think of a farmer who  
would this year thresh his wheat by  
flail or reap it with a sickle? Yet  
some folks take it as a matter of  
course that the farm women on  
Monday shall bend over a tub and  
washboard, or operate a washer by  
hand. I hold it to be a crime against  
motherhood, children, and society to  
send a woman's vital energy doing  
house power drudgery.Very often it is the fault of the  
women themselves but they do not  
have more to do with. In one town  
where we held a movable school  
this fall a merchant had a good  
power washer on display. It cost  
\$75. I noticed how interested one  
tired looking country woman was  
in it until she learned the price.  
(Not being accustomed to handling  
much money, \$75 seemed a fortune  
to her.)"John had to spend so much for  
fixing up the house this summer  
I wouldn't dare to ask him for it,"  
she said. Such a servient attitude  
it was.The merchant said, "Yes, what  
John had to pay on repairs he  
could have saved if he hadn't left  
the reaper out in the field since  
last harvest. It would mighty  
near bought yer washer."I suggested that he tell her husband  
that, and remind him that  
they would use the washer every  
week of the year, not just one.  
When because of the wife's sickness  
or for any reason the man has  
to do the housework for a week or  
two he almost invariably sets about  
making things more convenient  
than he found them. From what I  
have observed in homes in other  
lands I think the American husband  
is the best there is, and it is because  
the men do not realize the un-  
handy conditions under which women  
work that they have not equipped  
their homes properly. It is the  
business of the women to make  
them realize what an efficient house  
equipment is. While everything  
else on the farm is being standardized,  
it is high time the farm house  
and its equipment should come in  
for its share of attention.

## LIGHT COMPANY PICNIC.

The picnic of the employees of  
the Jacksonville Railway and Light  
company will be held at Nichols  
park next Wednesday night of  
Thursday as at first intended. The  
19th had been secured by the Mt.  
Emory Sunday school some time  
before the others applied and it  
was deemed better not to have the  
two on the same day though of  
course there is time for the picnic  
as many societies gathering there at  
a time as wish to do so but it is more  
pleasant to have one at a time.ENGINEERING WORK  
BRINGS GOOD PAYBUSINESS OFFERS OPPORTUNITY  
IN MANY LINES.Nearly 8000 Young Men Enter  
Technical Schools Each Year to  
Take Training—Not An Easy  
Road to Wealth But Offers Certain  
Rewards for Industry and  
Ability.(By H. F. Moore, Professor of Engineering  
Materials, University of Illinois.)Does your boy want to become an  
engineer? Does he dream of building  
railroads, big bridges, dynamos,  
aeroplanes? There are a  
good many such boys in this country.  
Every year about eight thousand  
of them enter American technical  
schools. If your boy is that  
kind, you want to know about this  
"engineering business." Are there  
good opportunities ahead? Are the  
ranks crowded with youngsters trying  
to rise? Does it pay for your  
boy to spend four of the best years  
of his life in an engineering school?  
If he is to go which is the best  
school for him to attend?Some few years ago the editor  
of a daily paper in a middle-west  
city of about twenty-five thousand  
remarked, "Where do all your engineering  
graduates find jobs? I  
know that in this city we have a  
"city engineer" but I don't know  
of any other." As a matter of  
fact, there were in that particular  
city three factories employing a  
dozen engineers apiece. There was  
the office of a well-known hydraulic  
expert employing another dozen.  
There were (freight yards, round  
houses, and minor shops of two  
large railways, the offices of several  
state industrial commissions, the  
electric light and railway system,  
the city water works and gas works,  
a sewage disposal plant, the usual  
telephone and telegraph service, a  
dozen small manufacturing plants,  
and two or three good sized contracting  
firms. Probably not less  
than a hundred engineers—civil engineers,  
mechanical engineers, and  
electrical engineers—were practicing  
their profession in that city.Engineering today is no easy road  
to wealth, but it is an honorable  
and thoroughly worth while life  
work. While the engineer usually  
does not amass great wealth,  
he is, in general, well paid  
for his services. He has, moreover,  
the consciousness of being of service  
to his day and generation. The whole world  
recognizes the great public services of  
Goethals and his corps of engineers  
who dug the Panama canal; the  
same kind of service is performed  
by the engineer who is in charge of  
building a water works system for  
a small city. The water works engineer  
has to plan the economical  
digging of earth and blasting of  
rock. He has to take care of earth  
slides in degree rather than in  
kind. He has to plan dams, reservoirs  
and channels for the flow of water.The engineer's task is to take the  
germ idea of the inventor or the  
laboratory investigator and evolve  
from it a device of practical utility,  
reliability, safe to handle, economical  
in use. The transformation of the  
gasoline engine from a capricious,  
fragile laboratory device, into a  
reliable source of power is an  
excellent example of his work. The  
boy who aspires to become an engineer  
is seeking a place among the  
public servants who render scientific  
discoveries available for every  
day use.There is plenty of such work remaining  
to be done. The development  
of the transmission of electricity  
of sight as well as sound, the  
utilization of great power as  
sources of fuel, the design of steel  
or concrete railroad ties—these are  
examples of things which are theoretically  
possible today, but which  
have not yet been made practical.  
They are among the tasks of the  
engineer of the near future.The engineering profession is  
crowded but the "standing room  
only" sign has not been hung out  
yet. The records of the College of  
Engineering of the University of  
Illinois, a typical school show that  
in normal years, ninety per cent  
of the graduates of June find positions  
before September, and that ten  
years after graduation eighty-five  
per cent of the graduates are occupying  
useful and honorable positions  
in the engineering world.Is your boy the right type to  
make an engineer? If his plans to  
design tall buildings, to direct the  
operation of great factories, to become  
an expert in the testing of electrical  
apparatus, are to become realities,  
he will be purposeful, he will form  
the habit of asking for the "why"  
of things, and will train himself  
to be capable of long-continued  
hard work. In his college days  
and later in his professional career,  
he will always be in the company  
of dead-in-the-earth men; he will  
be a purposeless chap, he will  
sink into mediocrity or into flat  
failure.

## ENJOYED PICNIC AT NICHOLS PARK

The bookkeepers and day operators  
of the Illinois Telephone company  
enjoyed an outing Friday evening  
at Nichols park. The event was  
in honor of Miss Clementine Dillon,  
who expects to leave next week for  
a visit with friends in Peoria. The  
evening was pleasantly spent in rowing  
and dancing. Delicious and season-  
able refreshments were served. Anna  
Those present were Misses Anna  
Detters, Melba Anderson, Zula  
Groves, Ethel Pank, Kathryn Hag-  
O'Brien, Gladys Hamilton, Genevieve  
Herster, Lutina McLaughery, Irene  
Hall, Gretel Moses, Clara Austin,  
Emma Walter, Martha Hall and  
Mayme Hayden.WESTERN QUEEN

THE JOHNSTON  
AGENCYSCIENCE GIVES AID IN  
KEEPING HOGS HEALTHYImmunization Robs Cholera of Much  
of Its Terror—Single Treatment  
When Pigs are Few Weeks Old,  
Followed by Later Treatment Has  
Proved Best Results.

(J. S. Coffey, Ohio State University.)

## Maintenance of Health and Hygiene.

Modern science has contributed  
greatly to the great consideration of  
keeping swine healthy. Hog cholera  
has ever been the nightmare of the  
swine producer, but with our  
present methods of immunization,  
death from this disease may be reduced  
to a minimum. Certainly, the  
swine producer must use proper  
methods to prevent and further-  
state the system of immunization  
should be as follows: The pigs  
should be given the single treat-  
ment when four or five weeks of age,  
although the pig born of an immune  
sow is by heritage immune for four  
or five weeks. When the pigs are  
three to five months of age, the im-  
munization should be made more  
complete by the administration of  
the double treatment. The details  
of treatment cannot be dealt with  
in this discussion. However, upon  
application to a capable veterinarian  
such may be obtained. The advice  
given in the preceding is mostly of  
a positive nature. In contrast a few  
"don'ts" should be observed. First,  
do not postpone the immunizing of  
animals until a malignant form of  
cholera appears. Second, do not  
take chances by employing a bungling  
amateur or an incompetent veteri-  
narian. Third, be sure that both  
the serum and virus are of stand-  
ard make and good quality. A  
course outlined as above if carried  
out in detail will greatly prevent  
losses and eventually lead to greater  
profits to the swine producer.There are other important phases  
of hygiene and health which if properly  
considered result profitably to  
the swine grower. However, nearly  
all other detrimental influences  
may be avoided by proper attention  
to one and all of the following  
phases of management: (1) A sanitary  
abode including cleanliness of  
quarters, light, ventilation and  
drainage, (2) wholesome and nutri-  
tious food, and (3) sufficient exercise.  
Such ailments as thumps,  
lame backs, dust coughs, weak pas-  
terns, and stunted growth are nine  
times out of ten due to neglect of  
one or all of these important phases  
of management. Considerable time  
and space could be devoted to tell-  
ing the swine grower how to main-  
tain a sanitary abode and give his  
animals exercise, however, such ad-  
vice seems superfluous. The swine  
grower should know when his pens  
are foul, damp and poorly lighted.  
He should also know when the quar-  
ters are cramped and offering little  
opportunity for exercise and sun-  
shine getting, of the little pigs.  
When he finds these adverse conditions  
prevailing, he must correct  
them if he is to attain greatest suc-  
cess as a pig raiser.—In Ohio Agri-  
cultural Student, Ohio State University.The farmer today really has the aim  
of keeping the farmer down. That  
is to say, it is the fight of pride  
and privilege against the common  
man, and represents the stand of  
imperialism against democracy. It  
is the expression of the theory of those  
who think that some men and some  
nations are good enough to rule over  
other men and other nations against  
their will. All wars have their origin  
in the wicked passions of men,  
but mainly in these two, arrogance  
and greed. No nation can make  
money out of any war, and no nation  
that begins a war can tell how  
it will end. So long as those inter-  
ested in the manufacture of arms  
and armor plate, or interested in  
the loaning of money to maintain  
fighting, are in control, just so long  
will there be war, and the farmer  
will pay for it. "Agriculture is the  
foundation of manufacture and com-  
merce." The farmer, therefore, is  
at the basis of prosperity, and it  
is bad for the whole world when  
things go ill with the farmer.  
"Fall to each whate'er befall."  
The farmer he must pay for all."FARMER NEEDS SECURITY TO  
BRING THE BEST RESULTSNo Class of Citizens Suffers More  
Eventually from the Effects of the  
War—The Example of Belgium.In an article last week, Doctor  
David Starr Jordan described what  
war required and what it took away  
from the farmer. The world of its best  
men he makes the following state-  
ments: "The farmer, therefore,  
should dread war more than all other  
men. He knows what it means  
to breed from thoroughbreds, or to  
breed from scrubs."For himself the farmer needs,  
most of all, security—security to  
plant his crops and to be sure that  
they will have a chance to mature.  
Security can be had only with peace.  
There can be no abiding civilization  
without this security for prop-  
erty and life, and there can be no  
abiding peace save in democracy.  
The farmer has no greater enemy  
than war, and no greater need than  
peace, and it is the highest duty of  
a democracy to furnish the peace  
which its inhabitants desire.Until the end of July Belgium felt  
as secure as the United States. Bel-  
gium was industrious, prosperous,  
and peace loving. Now its farms and  
villages present black desolation.  
Everywhere in Europe before the  
present war broke out, the farmer  
was heavily taxed to pay the inter-  
est on the old war debts. All wars  
are fought on borrowed money, and  
no war ever fought has yet been  
paid for by any nation. On the top  
of all this comes the burden of the  
costliest and most horrible war that  
was ever fought.The war today really has the aim  
of keeping the farmer down. That  
is to say, it is the fight of pride  
and privilege against the common  
man, and represents the stand of  
imperialism against democracy. It  
is the expression of the theory of those  
who think that some men and some  
nations are good enough to rule over  
other men and other nations against  
their will. All wars have their origin  
in the wicked passions of men,  
but mainly in these two, arrogance  
and greed. No nation can make  
money out of any war, and no nation  
that begins a war can tell how  
it will end. So long as those inter-  
ested in the manufacture of arms  
and armor plate, or interested in  
the loaning of money to maintain  
fighting, are in control, just so long  
will there be war, and the farmer  
will pay for it. "Agriculture is the  
foundation of manufacture and com-  
merce." The farmer, therefore, is  
at the basis of prosperity, and it  
is bad for the whole world when  
things go ill with the farmer.  
"Fall to each whate'er befall."  
The farmer he must pay for all."

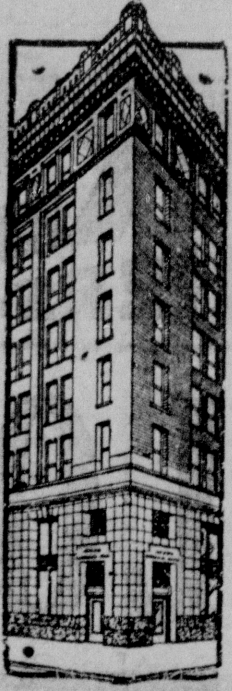

## PRELATE CONTINUING TO SINK.

Rochester, N. Y., July 8.—At ten  
o'clock tonight Dr. Joseph Culkin,  
one of the physicians attending Arch-  
bishop Quigley of Chicago at the  
home of his brother here said that  
the prelate was continuing to sink.  
The paralysis was spreading and  
the state of coma growing deeper.  
Death might come quickly he said,  
or it might be delayed several hours  
or several days. At 11 o'clock no  
further change had been noted.

## FUNK LANDS FURNISH EXAMPLE IN FARMING

WHOLE OF 25,000-ACRE ESTATE  
SCIENTIFICALLY MANAGED.

Big Picnic Held Friday Attracted  
Crowd of Eight Thousand—Memorial to Isaac Funk Dedicated—  
Henry Wallace Made Address—  
Hundreds of Automobiles Took  
Visitors to Most Interesting Farm  
Departments.

Eight thousand persons attended the big picnic given on the Funk farms in McLean county Friday. The Funk farms embrace more than 25,000 acres, the greater portion of which is in cultivation. The land was all originally a part of the estate of Isaac Funk and his descendants own the lands today. The farms are owned separately by members of the Funk family, but in some details are operated in a joint way. The estate is the largest in Illinois. The great gathering Tuesday was managed by members of the Funk family, The Prairie Farmer and the McLean County Better Farming Association. As a part of the day's program a monument was dedicated to Isaac Funk. It consists of a great boulder on which has been placed a bronze tablet paying tribute to this pioneer for his contributions to improving agriculture.

Among farmers from this locality who attended the picnic were Stansfield Baldwin, Thomas Hombrough, Alfred Hombrough, Albert Hopper and Wellington Huffaker.

Good Speakers on Program.  
An outdoor exercises of the day took place in a grove on the Funk farms, and possibly the greatest interest attached to the visit to various places of special interest on the farms. Free automobile service had been provided and in accordance with a well ordered plan practically every one of the vast throng present took an auto trip of two hours length which included stops at the principal places of interest. The occasion was indeed a notable success and was termed the greatest gathering of its kind ever held in Illinois. One unusual fact was that the program was carried out just as planned and there were no disappointments.

C. V. Gregory, editor of the Prairie Farmer and a practical farmer as well as the chairman of the day and briefly outlined the purposes of the day and the plans made for carrying it out. An address of welcome was given by D. O. Thompson, farm adviser for McLean county and then "Uncle" Henry Wallace, editor of Wallace's Farmer made an address. This was followed by the dedication of the Funk monument with an address by President John W. Cook of the DeKalb normal school. E. D. Funk in behalf of the Funk family expressed pleasure over the presence of so many people and then Carl Vrooman told something about the work of the department of agriculture. He said the government has spent \$250,000,000 in agricultural development work and there are 15,000 persons employed in the department. He said if McLean is not receiving its share of the benefit of money contributed for development work the fault lies with the farmers themselves.

This ended the formal program and then the audience which surrounded the speaker stand was invited to go to the monument where a moving picture was taken. Afterwards Jacob and Lafayette Funk, the only two surviving sons of Isaac Funk, stood one on either side of the monument and with members of all the Funk families about them had a group picture taken.

Believe in Alfalfa.  
That the Funks are great believers in alfalfa is evidenced by the fact that more than a 1,000 acres is growing this year. Possibly no one field contains more than 40 acres and the stages of development vary. Some fields were planted last summer or fall and others are four or five years old, possibly older for the Funks were among the earliest advocates of alfalfa in Illinois. There are thousands of hogs on the four various droves including animals weighing 200 pounds or better have never had an ear of corn but have made their growth with alfalfa as their food. There are a number of good Morgan county farmers who believe in alfalfa and believe in it but declare that as pasture for hogs it does not make money and in addition claim that the hogs soon kill out the alfalfa. The best answer for these farmers would be to visit the Funk farm for there hogs are feeding in field after field of alfalfa. If one were asked the two things which seemed to dominate the interest among the Funk farm products the answer would be "hogs and alfalfa." Lawrence Funk who owns one portion of the estate now has more than 700 brood sows besides other swine. His slogan is "5,000 hogs and 240 acres in alfalfa by 1918" on his own farm.

Lately, too considerable attention has been given to sweet clover with satisfactory results. There is one field of 150 acres and several smaller tracts. At a dairy barn on the Dean Funk farm a placard says that a five acre field of sweet clover has supplied ample pasturage for 150 head of hogs and for 30 cows during the night. On this same farm now 200 head of hogs are in a two acre field of sweet clover and are being fattened for the market. They have access to an adjoining field of alfalfa but no grain is being given them.

The Staple Crops.  
And while hogs and alfalfa have so large a place in their farm, interest naturally in such a vast acreage, the crop preponderance is in farm of the staple corn, wheat and oats. This year there is about 8,000

acres of corn and a large amount of wheat. The wheat is all safely in the shock and the indications are for a yield averaging from 35 to 50 bushels. The corn in size is not as far advanced as some in this locality but the quality is more uniform and there is not a streak of yellow, sickly looking plants in all that vast acreage. One thing which impressed visitors to the farm was the absence of weeds and evidently the warfare against them is unceasing for the corn is free from them and the same is true along the fence rows.

On several of the farms special attention is given to dairying and the facilities for the care of the cows are the best. There are two herds of Guernseys with a scattering of Jerseys. One of the dairy barns is mentioned in some detail below. One purpose for the attention to dairying is the securing of fertility and all manure from the barns is carefully handled so that nothing is lost which may aid in the replenishment of the soil.

On one farm poultry is given special attention. 6,000 white leghorns are kept there. An immense incubator room has space for 4,000 eggs. The pens brooding and laying rooms are built with concrete floors and face to the south with a broad expanse of glass. Lots with planted to rye are used for the runways and in all the houses rye straw is used for a scratch bed as rye straw has been found better for the purpose than either wheat or oat straw. One thousand unfertilized eggs are sent daily from this farm to the Auditorium Hotel in Chicago.

There are a great many sets of improvements and although most of the owners of the land now live in Bloomington the farm houses are kept in model condition. To attempt to describe all the activities of a 25,000-acre farm in a brief newspaper article is impossible and only a general idea can be given. But these activities might be summed up in a paraphrase upon the inscription on Isaac Funk's monument. "The Funks are setting an example to farmers of the present day and to posterity for better agriculture."

Testing Oats.  
Eugene D. Funk has 29 varieties of oats growing on plots across from his residence. He procured a small amount of the seed from each of the first prize oats from each state at the last national corn show. There are oats from most every state that grows the crop and from Canada also. Mr. Funk's idea is to find some variety now being grown on the Funk farm. At the present time his own oats look better than any of the others, but these different varieties show great differences in hardiness, manner of growth, etc.

Ideal Dairy Barn.  
A round dairy barn 72 feet in diameter and with plenty of rooms for 45 cows is one Funk farm improvement which is much out of the ordinary. At present the owner is milking 25 cows, from which he receives 65 gallons of milk. One of his cows at present is giving 52 pounds of milk a day, and considering that they are getting nothing but pasture feed, this is a remarkable record.

In the center of this barn is a huge silo 18x52 feet in dimensions and has a capacity of 200 tons of silage. The barn is fitted with a circular track used in moving away the hay and the lower floor of the barn is so finished that the wagon can be driven into it and unloaded. Plenty of room has been left on this floor to house the different farm implements from the weather.

Curing Alfalfa.  
Lawrence Funk has a method of alfalfa curing which has not been seen on any other farm in Illinois. He uses a sled rack. It is a rack about the size of a hay rack, having a frame about six feet high set on runners. It will hold about 1,000 pounds of hay. When the hay has wilted on the ground a rack is filled half full and then boards put across the frame to leave an air space and it is filled to the top. Mr. Funk has muslin covers for these racks which protects the hay from rain and sun.

Mr. Funk has 100 of these sled racks, built of the lumber from his timber. There are several advantages to this kind of rack. First, it takes the hay off the ground so that if rain comes the cock will not draw moisture. It protects the hay from rain and sun and makes the finest kind of pea green hay. The hay can be left in this rack until dry enough to bale and a team can be hitched to the sled and it can be drawn to the barn or baler, which saves handling and losing the leaves.

Drink Claus' Famous Coffee.  
ELECTION PETITIONS.

William N. Hairgrove stated last night that the petition he has in his office includes the names of more than 600 voters who want to see the question of return to the aldermanic form of government voted on. There are many lists out, Mr. Hairgrove says, and he is anxious that they be returned to him soon, so that the whole can be made ready for filing with the city clerk.

ELLIOTT STATE BANK.  
All deposits made in the savings department of the Elliott State bank during the first ten days of July will draw interest from the first of the month.

FOR SALE—Have a new piano shipped to Jacksonville for a party who has left town. Will sell at dealers price rather than go to expense of returning to factory. Address Piano, care Jacksonville Journal. 7-10-15

## FUNERALS

Wells.

The following is taken from the Ventura, Cal., Free Press:  
The funeral services of Mrs. J. C. Wells were conducted from her late home, 126 West Mea street, Ventura, by Rev. Harlane of Santa Paula, June 23, at 2 p. m.

The deceased was born July 29, 1838, in Winchester, Ill., and was married to John C. Wells August 18, 1854.  
Died June 20, 1915, at the age of 76 years, 11 months and 21 days. She was the mother of 11 children. Five have preceded her to the last resting place. She leaves to mourn her death a husband, J. C. Wells; three sons, G. W. Wells of Chatsworth, T. J. Wells of Ventura, B. F. Wells of Ventura; and three daughters, Mrs. W. H. Bauman, Ventura; Mrs. J. A. Peterson, Winchester, Ill.; and Mrs. L. A. Gillespie of Blythe, Cal.; also a brother in Colorado and 18 grandchildren and one great-grandson.

The pall bearers were her five grandsons, Gwen Hendershot, John Bauman, Walter Wells, Ben Wells, Robbie Wells and Frank Wells. She became a member of the Christian church at the age of 13 in Winchester, Ill., since which time she had lived a true Christian life.

Feed your chickens "KAFFIR CORN". Sold only by J. H. Cain & Sons.

## FOUND ROADS BAD.

T. M. Tomlinson and party reached Macon county Thursday night and remained there until Friday morning. The fact that they met but two cars between Jacksonville and Decatur indicates that travel conditions were very unsatisfactory.

Try Claus' Tea for Ice Tea.

### FRANCIS W. BROWN DIES AT HIS HOME IN LINCOLN, NEB.

Succumbs to Serious Operation Performed Several Days Ago—Formerly Resided in New Berlin and Brother of the Late William Brown of This City.

Word was received in the city by Lloyd Brown and Alden Brown of the death of their uncle, Francis W. Brown, at his home in Lincoln, Nebraska, Wednesday evening. Several days ago Mr. Brown underwent an operation, which hastened the end. He had not been in good health for some time. He was 66 years of age.

At one time he was a student in Jacksonville and later employed by John I. Chambers in the lumber business. He went to New Berlin where he conducted a lumber yard and from there to Lincoln where he was president of the F. W. Brown Lumber company. At the time of his death he was postmaster of Lincoln.

He married Miss Jennie Bennett of Jacksonville, and they were the parents of three children one of who survives, Francis, Jr., who conducts a newspaper in Nebraska. He also leaves three sisters, Mrs. J. D. Smith of New Berlin, Mrs. Frank H. Houston of Kansas City and Mrs. William Bettler of Philadelphia. He was a brother of the late William W. Brown of this city.

Knoles is the friend of the man who wants good clothing right.

### ASSOCIATED PRESS

**MAN IN CITY**  
Edgar T. Cutler of Chicago was in the city yesterday looking after business connected with the Associated Press. Mr. Cutler is news editor of the Associated Press in Chicago and has been making a trip through the south. He is a friend of Prof. James H. Rayhill of this city and had a pleasant visit with Prof. Rayhill Friday.

Drink Claus' Famous Coffee.

**OPERATION FOR APPENDICITIS**  
W. Barr Brown, Sr. was operated on for appendicitis at Passavant hospital Friday. Dr. A. M. King was the surgeon. Mr. Brown had two previous attacks but it was thought that it might be indigestion. He is recovering nicely from the operation.

### NOTICE

The Anti Horse Thief Association will hold its regular meeting Saturday, July 10, at 2 p. m.

A. C. Reid, President.  
Miss Lela Dily of Kinderhook and Miss Hazel Cunningham of Barry are visiting Miss Jane Foreman, 881 Case avenue.

### WINCHESTER

The funeral services of Mrs. Lee Violet, will be held Sunday afternoon at 2:30 from the Christian church in charge of Rev. G. E. Pre-witt. Interment will be made in the Winchester cemetery.

Miss Minnie Wilberts has returned to her home in Pittsburgh, Kansas after a visit with her sister, Mrs. James Brown, west of the city. Mr. and Mrs. Jesse Gibbs have returned to Canton, after a visit with relatives in Winchester.

Mrs. Carl Miller and grand-daughter Virginia Balsley are visiting in Ashland.

W. L. Alexander of Jacksonville was a business visitor here Friday.

Miss Ella Boylan of Jacksonville is visiting at the home of Mrs. Martha Paul.

Mr. and Mrs. Russel McLaughlin are rejoicing over the arrival of their daughter at their home Friday.

T. E. Lyons has been appointed postmaster at Winchester.

Henry Higgins has returned from Alton where he has been visiting. He was accompanied home by his grand-daughter, Helen Kinison.

Mrs. Howard McCullough of Riggs was shopping in the city Friday.

No mistake in buying summer clothing and furnishing goods of Knoles.

### GIANTS DEFEATED RAMBLERS.

The Giants defeated the Ramblers in a game of ball which was played yesterday afternoon near the Wash-railroads. The lineup for the Giants was Sullivan, pitcher; Good-well, catcher; Baptist, first base; Rust, second base; Hizer, third base; McNamara, short stop; Mohon, right fielder. For the Ramblers Burke, pitcher; Curtis, catcher; Sellers, first base; Guffy, second base; Pulasky, third base.

"KAFFIR CORN" at J. H. Cain and Sons.

### CARD OF THANKS.

We wish to thank the many friends for their kindness during the illness and after the death of our mother, Mrs. Mary J. Wilhite. Also for the many beautiful flowers that were sent.

Mrs. Frank Dean.  
Mrs. Lizzie Coe.

### TO ATTEND WEDDING.

Mrs. Hannah Ratcliff and daughter, Mrs. Edward Konrad, of 864 North Main street, have gone to Muscatine, Ia., to attend the wedding of her niece, Miss Bessie Ratcliff.

### July Sale of Warm Weather

**TAILORED SUITS.**

A. WEHIL.

### INDUSTRIAL CONDITIONS DO NOT REFLECT USUAL MID-YEAR LULL

Indications Point to Fully Sustained Activity Throughout the Summer Months.

New York, July 9.—Dun's will say tomorrow:

"Uniform progress is not to be expected at this period, when inventing and the advance of the vacation season tend to produce quietness in various mercantile lines. It is significant of the economic changes resulting from the war, however, that industrial conditions do not reflect the usual mid-year lull and all indications point to fully sustained activity throughout the summer months. Instead of showing the customary abatement, industrial operations steadily expand and each week there is a further reduction in the percentage of idle machinery and in the number of unemployed. This is a most encouraging feature, in as much as the retail demand for all kinds of staple merchandise is stimulated as more wage earners find work and pay rolls increase. Since the iron and steel trade is considered one of the best barometers of the general situation, it is gratifying that production at the mills and furnaces is rapidly rising close to the point of capacity, the output of pig iron last month being at the rate of 29-500,000 tons a year, against only 18,000,000 on January 1st.

"Bank clearings \$2,957,158,965 compared with \$2,584,364,322 last year."

### ANNIVERSARY OF

### MUSTERING OUT.

Just fifty years ago today at Louisville, Ky., Capt. Alexander Smith was mustered out of service. Capt. Smith enlisted April 15, 1861 in Co. E, 7th Illinois Infantry. His company was the first to appear at Camp Yates. Capt. Smith enlisted the first three months as a corporal. He was then made 1st lieutenant and afterward became captain of the company. After serving throughout the four years of the war Capt. Smith naturally has the date of his discharge indelibly stamped in his memory.

### Drink Claus' Famous Coffee.

### KILLED 47 MOLES.

S. J. Henry, residing a short distance east of Murrayville, has killed 47 moles since the first of March. Sixteen of the little pests he has destroyed with a trap and the rest he has caught by watching where they were burrowing and taking them out to their death.

### Mr. and Mrs. Frank Branstetter

of North Fayette street, have returned from a visit of two weeks enjoyed with friends in Stonington and Decatur.

### REV. J. P. MILLERBY ENJOYS EIGHTY THIRD BIRTHDAY

His Long and Useful Life Spent First in England and Later in This Country.

One of the most vigorous and energetic octogenarians in the city is Rev. J. P. Millerby who first saw the light of day in Driffield, Yorkshire, England, July 10th, 1832. He attended school till about thirteen years of age when he was apprenticed to be a draper which in this country means a dry goods clerk, for a man who sold both dry goods and groceries. In those days an apprenticeship meant hard work and small pay. A lad was expected to serve seven years receiving little more than board and clothes with a small modicum of spending money the latter part of his service.

He worked in his native town and then four years in Sheffield as the man to whom he was apprenticed died. He also worked some in York and Scarborough. When he was 22 years old he decided to remove to this country and accordingly took passage on a sailing vessel which he thinks of as an old tub. There were on it six hundred passengers, nearly all German and Irish, and they were a motley set. The voyage was long and tedious and they suffered in violent storms while at sea and Mr. Millerby says it was both ludicrous and painful. When the vessel was tossing violently some of the immigrants would go down on their knees and pray most earnestly and impassion-edly and as soon as the water was calm they would be swearing.

One German was anxious to learn the English language and an Irishman mischievously taught him a choice assortment of oaths which he repeated not knowing what they meant and when he landed he tried to use them thinking he was talking to people in New York in their own language and he created no little merriment.

Mr. Millerby spent his first year after landing in Connecticut and then followed the setting sun as far as Illinois where he has lived mostly ever since with small intermissions spent in the east, in Kansas and Missouri. In 1859 he was married in Edgar county to Miss Jennie Collins and lived with her most happily till she was called home in 1901 since which time his dutiful children have made him always welcome and happy as possible. They are Carl Millerby, the west side successful dry goods merchant; Lulu, Mrs. Charles Hopper; and Mary, Mrs. E. T. Mendel, of Emporia, Kansas. He also has six grandchildren.

Early in life Mr. Millerby was converted and united with the Wesleyan Methodist church and long before emigrating to this country he began to preach the blessed gospel of which he has been a zealous advocate all his life. For many years he was a member of conferences in this state but the ill health of his wife prevented him from itinerary work and for a long time he has been a supply in various places.

He has always enjoyed good health with the exception of theague so common at an early day. Although past four score he has seldom been obliged to use spectacles and only puts them on for reading when the light is unusually poor and dim.

He is remarkably hearty and vigorous and could easily pass for fifty or sixty years. He is kind and genial in his ways, a devoted christian, and has a host of friends who will congratulate him on his birthday and wish him many more.

**WINDOW DISPLAY OF LINENS AND WHITE GOODS TODAY—SHOWS UP SOME VERY SPECIAL VALUES.**

### CLO CIRCLE MEET.

The Clo Circle of the Christian church of Litchberry, met Friday afternoon at the home of Misses Lora and Evaloe Petefish. Thirty members were present, Misses Iza, Maud and Edith White of Chapin being present from away. After the regular business session a contest was held in which the prizes were won by Miss Annabel Crum and Mrs. Irwin Patterson. Suitable refreshments were served.

Do you want comfortable clothing, best and cheapest? Try Knoles.

### TO USE TRACTION ENGINE.

After cutting about fifty acres of wheat with horses A. W. Petefish of Litchberry concluded to finish the remaining fifty acres with a traction engine. This morning Frank Nichols of Concord will start the work. The rains have so interfered with the labor that it is high time the wheat was cut.

**DEPOSIT YOUR SAVINGS** now and draw interest from July 1.—F. G. FARRELL & CO. BANKERS.
